- Global market visits
- Internship and apprenticeship programs
- Interview coaching
- Mentorship programs
- On-campus interviewing and résumé referrals
- Professional conference participation
- Weekly career presentations with alumni and other professionals
- Work shadow programs and corporate site visits

## ACTUARIAL SCIENCE Bachelor of Science

[www.stjohns.edu/actuary](http://www.stjohns.edu/actuary)

Actuaries are considered the “financial architects” of the insurance world. By using mathematics, statistics, and financial theory, actuaries determine the financial risks and consequences associated with accidents, sickness, death, and loss of property.

As an actuarial student at GSRM, you not only learn the quantitative analytical skills needed to pass professional actuarial examinations, but also earn an undergraduate business degree that is applicable to any field. This two-pronged approach ensures that you receive a well-rounded education that includes accounting, computer information systems, finance, management, marketing, and risk management.

**80%** of 2020 Actuarial Science graduates passed two or more Society of Actuaries/ Casualty Actuarial Society exams upon graduation.

*“The Greenberg School gave me more than just an exceptional education in actuarial science and insurance to prepare me for my career—it gave me a wholistic view of the insurance industry and a network that spans across the US and the globe.”*

**Gabriela Pigan '23GSRM**  
B.S., Actuarial Science

*The faculty and staff at GSRM are second to none. Their decades-long industry experience and unwavering support place students in a position to excel both academically and professionally.*

**Lorenzo Casanova '23GSRM**  
B.S., Risk Management and Insurance,  
and Class of 2024, M.S. in Enterprise  
Risk Management

## RISK MANAGEMENT AND INSURANCE

### Bachelor of Science

[www.stjohns.edu/riskmanagementandinsurance](http://www.stjohns.edu/riskmanagementandinsurance)

Risk Management and Insurance plays a central and essential role in an organization's strategic management as it involves the assessment and quantification of risks to their activities. Risk managers and insurance professionals help identify, evaluate, and manage key risks, such as natural disasters and man-made catastrophes.

St. John's has one of the oldest risk management and insurance programs in the US, and the School is widely respected in the industry and around the world. Here, you master the financial, legal, and economic theories that are at the heart of corporate risk management, while developing the business knowledge, skills, and values that are essential to careers in a wide range of businesses.

As a graduate of this program, you are thoroughly prepared for careers in many fields, including asset management, brokerage, claims and legal administration, corporate risk management, financial planning, underwriting, and more.

### Quantitative Risk and Insurance Track

Students in the Risk Management and Insurance program can opt to enroll in the Quantitative Risk and Insurance track. This unique pathway combines the fundamental educational elements of both the traditional Risk Management and Insurance major and the Actuarial Science major.

Students who excel in this track are often invited to complete their studies in the Actuarial Science bachelor's program.

**Hannah Manjooran**  
B.S., Risk Management  
and Insurance, Class of 2024

## WHY ST. JOHN'S?

### LOCATION, LOCATION, LOCATION

A key component of the Actuarial Science and Risk Management programs in GSRM is the University's **New York City location**. As a metropolitan university, St. John's benefits from New York's cultural diversity, its intellectual and artistic resources, and its unique professional educational opportunities.

During your first two years in these GSRM programs, classes take place on our **Queens, NY** campus. During your junior and senior years, courses related to your major are held at our **Manhattan, NY** campus, which is ideally located at 101 Astor Place in Manhattan's celebrated East Village neighborhood.

At the Manhattan campus, you benefit from the University's longstanding relationships with leading New York-area firms. You also have access to invaluable mentoring support from local alumni who are leading professionals in the field of risk management.

As a GSRM student, you can complement your academic studies with paid internships that are a short subway ride from campus.

The Manhattan campus is also home to The Kathryn and Shelby Cullom Davis Library, which holds the world's largest collection of risk and insurance literature, policies, and related documents. The Davis Library serves students of risk management, insurance, and actuarial science around the world as a center for study and research.

**198,000+**

St. John's Alumni

*GSRM has provided me with a multitude of opportunities. I am extremely grateful for the connections I have made through the School's network. I've been fortunate enough to attend several conferences and meet insurance company representatives throughout New York and Europe. I couldn't be more thankful for this college experience.*

### CONNECTIONS THAT COUNT

The Greenberg School of Risk Management offers an impressive network of alumni and supporters—including a 45-member advisory board comprised of chief executive officers and top industry leaders worldwide—who provide students with regular access to industry professionals at every level.

**colleges and universities** in  
the world to be named  
a Global Center for  
Insurance Excellence  
by the International  
Insurance Society

## A RICH HISTORY

The Maurice R. Greenberg School of Risk Management, Insurance and Actuarial Science was first formed in 1901 as the Insurance Society of New York. In 1947, it became The School of Insurance, and later, became known as The College of Insurance (TCI). In 1984, TCI opened the doors to its new home at 101 Murray Street in Manhattan. In 2001, St. John's University merged with TCI, and in 2014 the School moved to its current location at 101 Astor Place. In January 2020, the School was renamed the Maurice R. Greenberg School of Risk Management, Insurance and Actuarial Science, in honor of Maurice R. "Hank" Greenberg, Chairman and Chief Executive Officer, C.V. Starr & Co. Inc.
