I. INTRODUCTION

A. Mission Statement of St. John's University

As a university, we commit ourselves to academic excellence and the pursuit of wisdom which flows from free inquiry, religious values and human experience. We strive to preserve and enhance an atmosphere in which scholarly research, imaginative methodology, global awareness and an enthusiastic quest for truth serve as the basis of a vital teaching-learning process and the development of lifelong learning. Our core curriculum in the liberal arts and sciences aims to enrich lives as well as professions and serves to unify the undergraduate experience. Graduate and professional schools express our commitment to research, rigorous standards, and innovative application of knowledge. We aim not only to be excellent professionals with an ability to analyze and articulate clearly what is, but also to develop the ethical and aesthetic values to imagine and help realize what might be.

St. John's is a Catholic university, founded in 1870 in response to an invitation of the first Bishop of Brooklyn, John Loughlin, to provide the youth of the city with an intellectual and moral education. We embrace the Judeo-Christian ideals of respect for the rights and dignity of every person and each individual's responsibility for the world in which we live. We commit ourselves to create a climate patterned on the life and teaching of Jesus Christ as embodied in the traditions and practices of the Roman Catholic Church. Our community which comprises members of many faiths, strives for an openness which is "wholly directed to all that is true, all that deserves respect, all that is honest, pure, admirable, decent, virtuous, or worthy of praise" (Philippians 4:8). Thus, the university is a place where the Church reflects upon itself and the world as it engages in dialogue with other religious traditions.

St. John's is a Vincentian university, inspired by St. Vincent de Paul's compassion and zeal for service. We strive to provide excellent education for all people, especially those lacking economic, physical, or social advantages. Community service programs combine with reflective learning to enlarge the classroom experience. Wherever possible, we devote our intellectual and physical resources to search out the causes of poverty and social injustice and to encourage solutions which are adaptable, effective, and concrete. In the Vincentian tradition, we seek to foster a world view and to further efforts toward global harmony and development, by creating an atmosphere in which all may imbibe and embody the spirit of compassionate concern for others so characteristic of Vincent.

We benefit from New York City's cultural diversity, its intellectual and artistic resources, and the unique professional educational opportunities offered by New York, Rome and other cities throughout the world where our students study and serve. With this richness comes responsibility. We seek and welcome opportunities to partner and plan with our metropolitan communities. We encourage them to use our intellectual resources and professional expertise in developing solutions that address strategic issues of mutual concern. On the local, state, national and international levels, our alumni serve as effective leaders and responsible citizens. We pledge to foster those qualities required for anticipating and responding to the educational, ethical, cultural, social, professional, and religious needs of a dynamic world.

In November 2000, the University adopted a vision statement that expresses our educational philosophy.

St. John's University will empower diverse learners with quality education for life. Through innovative teaching, research, and service we will foster rational, spirited inquiry and intelligent reflection. Our student-centered approach will be shaped by a caring, energized, nimble culture. Enlivened by our distinctive mission, our graduates will excel in the competencies and values required for leadership and service in a rapidly evolving global community. As a Catholic & Vincentian University, we will be known worldwide for addressing issues of poverty and social justice.

B. The Philosophy of the Graduate Division of Arts and Sciences

Graduate education differs significantly from undergraduate education. The following quotation is a statement of principles from the *Council of Graduate Schools* and represents what graduate education should be:

Graduate education establishes an atmosphere of intellectual collegiality in which interaction among people with differing points of view is essential to learning. Students must deal with subject matter at the leading edge of their disciplines, a territory characterized by different and often opposing points of view. They must learn to question what they read and write in a way that is both rigorous and evenhanded. They must maintain high standards for the criteria of proof, and they must be not only willing, but eager, to test their ideas in a forum of peers and colleagues. In this way, they hone their own skills and learn to engage in and contribute to the continuing discussion that defines the current consensus in any field.

By bringing diverse individuals together to engage in intellectual activities, graduate education engenders respect for intellect, regardless of source, and builds a community whose members are judged by the quality of their ideas. The importance of this kind of preparation cannot be overstated. Graduate study serves to educate and train our teachers, our scholars, our scientists and engineers, our leaders in business, government, and the professions. They will work in a rapidly changing world where race, gender, ethnicity, nationality, and related factors merge with knowledge, merit, and talent to play important roles in shaping society. Their ability to deal with differing ideas and viewpoints will enable them to interact effectively with people in all sectors of that society throughout the world.

C. Student Composition

With more than 20,000 students, St. John's University is the largest Catholic University in the nation. St. John's is a forceful presence and integral part of the New York metropolitan scene. The two campuses are situated in residential areas of the city to provide easy access to the vast cultural, educational, commercial, and religious resources of the world's greatest metropolis. Consisting of nearly 100 rolling acres, the Queens campus consists of broad lawns, playing fields, modern buildings, and a spectacular view of the New York City skyline. The Queens campus is only minutes (11.6 miles) from midtown Manhattan and is also near the population

center of Long Island with its unequaled recreation facilities. The diverse student population of St. John's includes students from 116 foreign countries. St. John's has a placement rate of over 80% for graduates within ninety days of commencement. With more than 1500 microcomputers and terminals connected to mainframes and local area networks, St. John's has met the computer age head on. The cornerstone of St. John's array of student facilities is its magnificent library which, with the Staten Island Campus Library and Law School Library, contains 1.5 million volumes. The University Library collection supports both the graduate and undergraduate programs. In addition to books and periodicals, the library includes thousands of microfilm, microfiche, audiovisual materials, as well as on-line computer access to reference information.

II. OVERVIEW OF THE SCHOOL PSYCHOLOGY PROGRAM

A. History of School Psychology at St. John's University

The School Psychology Program was founded in the early 1960's on the Queens campus and was the first graduate program in psychology at St. John's University. The program began as a result of an invitation from the New York State Education Department through Rev. John Flynn, C.M., and then President of St. John's University. Shortly afterwards, in 1976, the program evolved into a Ph.D. in Professional Child Psychology and a Masters/Certificate Program in School Psychology. During the 1980's, the program was moved from the School of Education to the Department of Psychology of the St. John's College of Arts and Sciences where it remains today. Currently, the Department of Psychology offers a 66-hour Master's Degree Program in School Psychology and a Psy.D. Program in School Psychology both are approved/accredited by the National Association of School Psychologists (NASP) and the School Psychology Psy.D. Program has been accredited by the American Psychological Association (APA) since April of 2007.

B. Program Philosophy

The School Psychology Program at St. John's University follows a practitioner-scientist model that is designed to ensure that school psychologists base their professional activities on a scientific understanding of human behavior, lifespan development, and the social and cultural influences of behavior. The mission of this program is to train future psychologists who will apply basic psychological knowledge to address the needs of children, families, and professionals in general and special educational settings.

Our students are trained to address these needs based on scientific review and evaluation. Specific emphasis is placed on providing students with competency to understand the unique needs of and provide services to underserved populations. The specific aims of our program are to prepare a) scientifically knowledgeable school psychologists; b) highly skilled professionals who can integrate and apply knowledge of psychological theory to educational practice in the service of promoting academic and social development of school age children; c) professionals to utilize educational practice to inform and extend psychological theory.

Program Mission

The Masters of Science (M.S.; Specialist Level) degree program in School Psychology has been designed to prepare the student for professional practice. In accordance with the Vincentian mission of St. John's University and the 11 stated training goals for the Graduate Programs in School Psychology, the M.S. program specifically aims to prepare:

1. School psychologists who can conceptualize psychological problems of children, adolescents, and their families as they relate to functioning within the school environment.
2. School psychologists who can engage in evidence-based assessment, consultation, and who can develop treatment plans and select interventions that are based on these data-driven methods to address the education and mental health needs of children and their families.
3. School psychologists who can review the theoretical and empirical literature on a professional topic and draw conclusions concerning how research will drive professional school-based practice.
4. School psychologists who can gather empirical data to answer professional questions.
5. School psychologists who can engage in professional activities at a level of competence that is consistent with professional standards and aspire to develop their professional practices at a level consistent with the highest ethical principles.
6. School psychologists who can appreciate and consider the diversity of social, cultural, and linguistic experiences that influence human behavior, academic performance, and student development.
7. School psychologists who can deliver or adapt evidence-based educational and mental health services to underserved populations.
8. School psychologists who will be regional, national, and international leaders in the field of school psychology and promote the aforementioned aims throughout their career.

1. Program Goals and Objectives

Goal 1. To Foster Skills in Data-Based Decision-Making and Accountability

Objectives:

- Use student data to identify student's strengths and needs, and measure progress and accomplishments
- Understand theories and methods of assessment and diagnosis
- Diagnose or define problems through psychological assessment and measurement
- Formulate and implement intervention strategies, including training in empirically supported procedures

Goal 2. To Foster Students' Consultation and Collaboration Skills

Objectives:

- Understand a variety of consultation models (e.g. behavioral, mental health, collaborative)
- Collaborate effectively with others in the planning and decision-making processes at the individual (child) level
- Collaborate effectively with others in the planning and decision-making processes at the group (classroom) level

- Collaborate effectively with others in the planning and decision-making processes at the system (school or school district) level.

Goal 3. To Foster Students' Development of Cognitive/Academic Skills

Objectives:

- Develop appropriate cognitive and academic goals for students with different abilities
- Implement interventions to achieve cognitive and academic goals for the students with whom you worked
- Evaluate the effectiveness of cognitive and academic interventions

Goal 4. To Foster Students' Development of Socialization and Development of Life Skills

Objectives:

- Increase knowledge in human developmental processes
- Develop appropriate behavioral, affective, adaptive, and social goals for students of varying abilities

Goal 5. To Foster Student Diversity in Development and Learning

Objectives:

- Understand the manner in which culture influences human behavior and development
- Work with individuals of diverse characteristics (individual differences, abilities, and disabilities).

Goal 6. To Develop Students' Understanding of School and Systems Organization, Policy Development, and Climate

Objectives:

- Provide educational services (e.g. general education, special education)
- Create effective learning environments for children and others
- Understand models of supervision (e.g. mental health, behavioral)

Goal 7. To Develop Students' Skills in Prevention, Crisis Intervention, and Mental Health

Objectives:

- Understand psychopathology and associated influences on biological aspects of human behavior
- Understand psychopathology and associated influences on cognitive aspects of behavior
- Understand psychopathology and associated influences on social aspects of behavior
- Assess psychopathology
- Prevention and intervention programs that promote the mental health and physical well-being of students

Goal 8. To Foster Home/School/Community Collaboration

Objectives:

- Understand family systems and methods to involve families in education and service delivery
- Work effectively with families, educators, and others in the community to promote and provide comprehensive services to children and families

Goal 9. To Develop Skills in Research and Program Evaluation

Objectives:

- Understand research, statistics, and data analysis techniques
- Evaluate research and translate research into practice
- Understand research design and statistics in order to plan and conduct investigations and program evaluations for improvement of services

Goal 10. To Foster an Understanding of School Psychology Practice and Development

Objectives:

- Understand the history and foundations of psychology
- Understand the history and foundations of the profession of school psychology
- Understand various service models (i.e., direct, indirect) and methods in school psychology practice (i.e. assessment, consultation, intervention)
- Understand public policy development applicable to services to children and families
- Understand ethical, professional, and legal standards in the practice of school psychology
- Become a life-long learner, conduct scholarly inquiries, and solve problems professionally

Goal 11. To Foster Skills in Using Information Technology

Objective:

- Understand information sources and technology relevant to your work to enhance the quality of services delivered

In order to meet the specified goals and objectives of the program, courses, practica, externships, and internship provide the students with the following experiences:

- Conducting individual psychological assessments of preschoolers, children, adolescents, and young adults.
- Implementing individual and group short-term counseling and psychotherapy with preschoolers, children, adolescents, and their families.
- Assessing the needs of special populations of children, adolescents, and young adults and developing programs to meet their needs.
- Consulting with teachers and educators about academic, behavioral, and social problems of individuals.
- Consulting with school administrators to evaluate and implement educational policy and educational instructional methods.
- Developing individual educational plans for exceptional children.

- Consulting with parents about academic, behavioral, and social problems of individual children.
- Performing program evaluations.
- Developing preventive mental health programs for regular and special education populations.
- Providing crisis intervention services.
- Providing support groups for parents, students and teachers.
- Discussing the legal and ethical standards involved in the delivery of school psychology services.
- Designing programs to meet the mental health needs of children, adolescents, and young adults and their families.

Students become familiar with the varied roles and functions of the school psychologist. The program exposes students to professional school psychologists in a variety of educational contexts: preschool, elementary, intermediate, secondary and college settings; special educational programs; Committees for Special Education; community mental health centers; and in residential, day, and hospital programs for exceptional children. We accomplish this through the diverse practica, field placements, and internships provided in the second and third years of course work.

3. Professional Psychologists' Oath

The Psy.D. program at the Philadelphia College designed the following oath of Osteopathic Medicine. We believe it represents the values and philosophy of our program. All students take the oath during their orientation to the program.

I (state your name) hereby affirm that I shall discharge the responsibilities of my profession in a manner consistent with respect for the dignity and worth of the individual, and that I shall strive for the preservation and protection of fundamental human rights; That I shall seek to increase knowledge of human behavior, to evaluate the effectiveness of my professional activities, to increase self-understanding and understanding of others, and that I shall use such knowledge for the promotion of human welfare; That I shall diligently protect the welfare of those who seek my services, and that I shall use my skills to further human welfare and the integrity of the individual; And that I recognize and honor the traditions and ethics of the profession of psychology.

C. Financial Support

The Psychology Department does not manage students' financial aid. Please consult with the Financial Aid Office with your financially-based inquiries.

1. Assistantships and Scholarships

Graduate assistantships are available in both academic and nonacademic departments throughout the University. Individual departments may have specific criteria for the consideration of assistants. The applicant should refer to the information provided by the Graduate Division of St. John's College for more information about these positions.

The University requires Doctoral Fellowship and Graduate Assistantship recipients to maintain a fulltime course of study and work a minimum of fifteen hours per week in their respective department. The assistantships provide tuition remission for a maximum of fifteen credits and sometimes, a stipend. Recipients are prohibited from outside employment for the duration of their contract with the University. Applicants for assistantships must also complete a Free Application for Federal Student Aid (FAFSA) and a New York State Tuition Assistance Program (TAP) application. Both forms are available in the Office of Financial Aid.

III. POLICY AND PROCEDURES

A. Academic Standing

All students must maintain a 3.0 grade point average to continue in the program. Students who fail to maintain a 3.0 average, either during a particular semester or in their cumulative record, are automatically placed on academic probation by the college. The Program Director, Chair, or the Dean may limit the program of a student on academic probation. Students on academic probation cannot sit for the third-year comprehensive examination. While on academic probation it is the student's responsibility to meet with the Program Director to arrange an appropriate, corrective course of action.

B. Full and Part Time Study

Full-time study means enrollment for at least nine credits per semester, or the equivalent. Equivalent full-time enrollment with fewer than nine credits require that students are completing an internship. In the second year of the program when enrolled in the practicum, students may register for up to fifteen credits: twelve credits of course work plus three credits of practicum. Students attending part-time should consult the University's bulletin concerning residency requirements and maximum length of time allowed to complete the degree. In addition, students are responsible for following course sequences to prevent needing to take courses in a semester when they are not ordinarily offered.

C. Registration

Students are solely responsible for registering for the correct courses that are required to fulfill their training requirements. If a student must deviate from the proposed course sequence (listed in this handbook) for any reason (e.g., not passing a course with a C [or B in certain courses] or greater), their completion of the program will likely be delayed.

Prior to each registration period, the Program Director and Program Administrative Assistant will prepare the registration forms for each cohort. Once they are complete, they will be placed

in the respective student mailboxes (located in the Psychology Lounge) so that student can register themselves online once the registration period commences. In the event that a student's program has deviated somehow from the proposed schedule of study, that student must contact the Program Director via e-mail specifying which courses they need to take to and how they plan on completing the remainder of the required courses, prior to the commencement of the registration period.

Under no circumstances will the University permit a student to enroll in a class after the late registration period ends, even if a student has been unofficially attending a class. Once a student receives a class schedule receipt, he or she is officially enrolled for the courses listed on the receipt. If a student wishes to withdraw from a course or change sections for a course, the student must obtain and complete the Change of Program form from the Graduate Division's Office. Unless a student officially withdraws from a course by following these procedures, the student will receive a final grade of "F" on his or her permanent record.

When there are two or more sections of a particular course, the department and the program reserves the right to direct students into particular sections of a course. This means a student may not get into a specific section of a course they had wanted.

If a student has any problems with his or her course work, practicum experiences, field placement, or internship experiences, or if the student has difficulty with unprofessional contact by any faculty member or supervisor, the student should first discuss such problems with the Program Director. If the student believes the matter has not been resolved satisfactorily, he or she should proceed according to the chain of command and consult with the Department Chair, the Associate Dean for Graduate Studies, and, finally, the Dean of St. John's College.

D. Continuous Enrollment

Continuous enrollment until graduation is mandatory for all students enrolled in degree programs. Students who fail to enroll in course work **MUST** maintain their active status by enrolling in the appropriate "Maintaining Matriculation" course during the scheduled registration period. Students who register for Maintaining Matriculation are no longer considered to be in full-time status and will be required to begin payments on any student loans they may have. Those students who fail to maintain continuous enrollment for one semester must:

1. Apply for readmission.
2. Meet the requirements of the program in effect at the time of application for readmission.
3. Be readmitted.

E. Time Limit

Students must fulfill all requirements within five years. Students may request to extend the time for obtaining the Master's degree if they are unable to devote their full time to graduate study. Please note that degree credit will not count for courses completed more than five years before

the granting of the degree. If a student takes longer than five years to complete the degree, he or she may have to retake courses more than five years old.

F. Attendance Policy

Faculty expect all students to attend classes regularly. No penalty exists for absence from class, unless a professor specifies in the course materials that class participation is part of the grade. Under no circumstances will students be excused from work missed. Students will always be held responsible for all announced exams and assignments at the proper due date. Individual faculty members determine whether or not a student is to receive a make-up examination. Please note, this policy does not apply to final examinations as the specifications are provided by the Dean's office each term.

G. Grading

The letter system for assigning grades and the quality points associated with each grade are as follows:

Grade:	Quality Points:
A	4
A-	3.7
B+	3.3
B	3
B-	2.7
C+	2.3
C	2
F	0
IN Incomplete	0
ABF Absent/Failure	0
WD Withdrawal	0
P Passing	0
AU Audit	0

All master's students must receive a grade of "B" or better in the following courses (661, 662/662B, 752/752B, 753, 761/761B, 762/762B) and a grade of "C" or better in all other courses to receive credit to count toward their master's degree.

The grade points earned for a course are derived by multiplying the points corresponding to the grade as depicted above by the number of semester hours of credit attached to that course. The total grade points for all courses divided by the total number of credits attempted yields the quality point index.

Students must receive a "C" or better to get academic credit in all courses. Students who receive a grade below a "C" in any course must retake the courses until they receive a "C" or better. Students may not enroll in the internship courses (752, 752B, and 753) if they have an incomplete in the practicum courses (761, 761B, 762, 762B). A grade of "F" will result in (1) immediate academic

probation and (2) review by the Graduate Education Planning Committee (GEPC) for determination of suspension or termination of the student's program.

It is solely the student's responsibility to be aware of any courses that need to be re-taken.

If a student wishes to formally appeal a grade, he or she should contact St. John's College to obtain a copy of the *Academic Fairness Procedure* document. This document outlines the recommended informal and formal routes for students to follow.

1. Incomplete Grades

The individual professor has the discretion to decide if a student can receive an incomplete grade. Students must receive formal approval from the professor to take an IN (incomplete). Students must request an incomplete before the end of the semester. Students receiving an IN grade (e.g., failing to submit a term paper or research project) must submit the missing work to the Dean's Office, not to the professor. The due date for removing incomplete grades appears in the Academic Calendar and is approximately two months after the start of the following semester. If a student desires a longer extension period, he or she must make a request in writing. Approval for such requests must come from the professor, Chair, and Dean's Office before the deadline. Failure to do so will result in a permanent incomplete, and the student must repeat the course if it is required in the program. If a student receives an incomplete in his or her final semester, he or she will automatically be removed from the graduation list. Failure to take the final examination does not qualify as a reason for an incomplete grade. This action has a separate grade category with different consequences.

2. Missing the Final Examination

Students who, for whatever reason, fail to take or complete the final examination in a course receive a grade of ABF. The professor must submit the make-up examination to the Dean's Office. The Dean's Office will administer the examination. Students must report to the Dean's Office immediately to determine the schedule for make-up examinations. The Dean's Office sets this date, not the professor. If a student fails to take the make-up examination, the ABF grade will be converted to a grade of F.

3. Withdrawal Grades

If a student withdraws from a course with the Dean's permission any time before the date indicated in the Academic Calendar, he or she will receive a grade of WD (Withdrawal). The date of withdrawal is the date the Dean signs the "Change of Status" form, which students can obtain in the Dean's Office. To withdraw from a course, students must have the necessary form signed by the Dean before the final five weeks of class. After that time, a student may not officially withdraw from a course.

To allow for greater precision in assigning final grades, the University has adopted the mark of UW ("unofficial withdrawal"). Typically, the mark of UW would be assigned to a student who: a) never attended class; b) attended so sporadically that there is no basis for assigning an earned grade; or c) who stopped attending without explanation and for whom there is insufficient basis for assigning an earned grade. The mark of UW does not affect a student's GPA.

This new mark is intended to provide faculty with an option to be used at their discretion and to eliminate the ambiguity that results from practices that allow the mark of WD to signify both an official and an unofficial withdrawal and the grade of F to signify both an earned failure and an unofficial withdrawal. Individual faculty are free to determine the circumstances under which the mark of UW is assigned.

4. Probation

A student whose GPA falls below a 3.0 will be placed on academic probation and does not qualify to sit for the comprehensive examination. The Chair and Dean's Office reserve the right to limit a student's program if he or she is on academic probation.

H. Final Examinations

The University's Academic Calendar will stipulate the final examination schedule. Students unable to sit for a scheduled final examination must contact the Dean's Office before the final exam and provide documentation of reason for absence. The Dean may approve a request for a make-up examination if the student's academic work is acceptable and when the reason for absence is of a serious nature. If a make-up exam is permitted, the student will receive a grade of ABF for the course until the exam is made-up. The grade of ABF will be converted to an F if the student fails to sit for the make-up examination at the scheduled time. Students who choose the ABF grade will pay a fee for the make-up exam. A student who fails to show up for the final exam without prior approval may be assigned a grade of F by the course professor.

I. Transfer Credits

A student may transfer a maximum of twelve (12) credits from another accredited university with the approval of the Program Director and Dean. Requested transfer credits must not have fulfilled requirements for another degree. Forms are available in the Dean's Office to request transfer of credit. Catalog descriptions and an official transcript copy must be presented to the Program Director for the graduate courses for which transfer credit is requested. The Program Director will forward all information to the Dean's office for final approval. If the grade obtained was below a B, no transfer credit will be allowed. No credit will be given for pass/fail courses. Transfer credits will not affect cumulative quality points. No degree credit will be allowed for courses completed after the stipulated time limit (see "Time Limits"). To request transfer credit, students must have already completed a minimum of twelve credits in the graduate program at St. John's. The entire review process takes one to two months. Transfer of credit must occur before the semester in which the student will be applying for the comprehensive examination.

J. Program Degree Requirements

The program requires the satisfactory completion of 66 credits (which includes a five-day per week internship during the third academic year), a comprehensive examination, and the Praxis School Psychologist examination. Upon completion of these requirements, students will be awarded the M.S. in School Psychology (after the third full year). This allows the student to qualify for a provisional New York State School Psychology Certification that authorizes practice as a school psychologist in the school system. This certificate is valid for five years from

the date of issuance. With the accumulation of two years of school experience, a permanent certification is issued in the field of pupil personnel services.

The Program is aligned with the requirements that are specified to practice as a School Psychologist and Psychologist in the State of New York. Students must be aware of the certification and/or licensure requirements for the location(s) in which they desire to practice. Some locations require training experiences that are not necessary in the State of New York (e.g., courses, supervision, workshops, etc). It is student's sole responsibility to be knowledgeable about these requirements.

K. Student Work Policy

School psychology students may not do psychological work in an off-campus facility that is not a part of their program requirements, field placement, courses, or university fellowship/assistantship without the approval of the Program Director. Violation of this policy may result in academic discipline. Any questions regarding this policy should be discussed with the Program Director.

L. Malpractice / Professional Liability Insurance

It is the student's responsibility to make sure they purchase some form of malpractice or professional liability insurance before they begin their assessment practicum (PSY 761 or 761B). Professional Liability policies need to be renewed each year, and updated copies of the current liability insurance certificate need to be given to the program administrative assistant as soon as the policy is issued. Given the applied nature of the program, the student must protect themselves against any unforeseen lawsuits. The University insurance policy covers students if they are doing professional work that is part of their degree requirements.

Insurance packages for psychology graduate students are readily available through the National Association for School Psychologists (NASP) and the American Psychological Association (APA). Insurance packages typically are not more than \$50 per 12 months of coverage. Each organization provides additional information and application packages on their respective websites.

M. Academic Integrity

The University's policy and administrative procedures governing scientific misconduct is outlined in its entirety in the policy document available from the Office of Grants and Sponsored Research. Below is an abbreviated version of the document and instructions for obtaining a copy of the entire policy.

Truth, integrity, and credibility are critical and distinctive principles of any educational and research institution. Adherence to these principles is essential for the efficient progress of scientific research and for the preservation of the trust of the public and the research community. The maintenance of accepted standards in research and scholarly conduct based on these principles is highly regarded by the scientific community and is a major responsibility of St.

John's University. Consequently, standards and procedures governing scholarly and/or scientific misconduct exist.

Scientific misconduct is generally defined as any fabrication, falsification, omission, plagiarism, suppression, theft, misappropriation, or other practice that violates the standards commonly accepted within the scientific community for proposing, conducting, or reporting research. Honest errors or honest differences in interpretations or judgments of data are not regarded as scientific misconduct. Specific acts of scientific misconduct include but are not limited to the following: falsification or misrepresentation of data, plagiarism, and abuse of confidentiality.

More extensive definitions of scientific misconduct and an outline of the procedures that are followed when an allegation of scientific misconduct occurs within the context of a research project are described in the University's Policy and Administrative Procedures Governing Scientific Misconduct document. This policy document is available on the St. John's website.

In addition, to provide more specific guidance to students writing term papers, the School Psychology Department has adopted a statement on plagiarism written by Dr. M. Roig. This statement provides a definition of plagiarism, examples of the various types of plagiarism, and provides teaching exercises to help students develop proper paraphrasing skills. The department's Plagiarism Statement is included in Appendix A.

N. University Policy on Harassment and Discrimination

The University's policy against discrimination, discrimination-related harassment, sexual harassment and related complaint procedures are set forth in the St. John's University Student Handbook. Below is an abbreviated version of the document and instructions for obtaining a copy of the entire policy.

Consistent with the University's mission as a Catholic, Vincentian, and metropolitan institution, the University abides by all applicable federal, state, and local laws which prohibit discrimination on the basis of race, religion, color, national or ethnic origin, age, sex, sexual orientation, marital status, citizenship status, disability, genetic predisposition or carrier status, and status in the uniformed services of the United States in any educational or employment program, policy, or practice of St. John's University. In accordance with these laws, the University also prohibits retaliation against anyone who has complained about discrimination, discrimination-related harassment or otherwise exercised rights guaranteed by these laws.

Harassment assumes many forms. Sexual harassment includes unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature when submission to or rejection of such conduct interferes with an individual's education or employment. Additional forms of discrimination-related harassment include verbal forms (i.e., racial or sexual epithets, derogatory slurs), visual/non-verbal forms (i.e., derogatory posters, leering, or obscene gestures), physical forms (i.e., unwanted touching, patting, hugging, etc.), and making or threatening to make reprisals as a result of a negative response to harassment.

St. John's also adopts a non-fraternization policy. Specifically, amorous or sexual relationships are not to be conducted by persons in unequal positions. The University considers it inappropriate for any member of the faculty, administration, or staff to establish an intimate relationship with a student upon whose academic or work performance he or she will be required to make professional judgments.

Any member of the University community who believes that he or she has been the victim of discrimination or harassment should follow the complaint procedure outlined in the St. John's University Student Handbook. Briefly, students who believe they are the victim of discrimination or harassment should promptly report the matter to their immediate supervisor, the Department Chair, the Dean of the College of Arts and Science - Graduate Division, or the Dean of Student Life. If resolution at the direct administrative level is not successful, students may contact the University's Compliance Officer. Disciplinary action will follow the procedures outlined in the Collective Bargaining Agreement and University Statutes.

Students have the option of following an informal or formal complaint procedure. The informal procedure does not require written documentation. Typically, a series of meetings are held with all appropriate officials in attendance. The purpose is to achieve a local resolution that is satisfactory to the student. Although the process is called informal, the procedure and its outcome are official.

To launch a formal complaint procedure, students are required to submit a written complaint statement to the University's Compliance Officer within 60 days of the alleged discrimination or harassment. Within 14 days, the Compliance Officer must begin to investigate the complaint. Every effort is made to resolve the complaint within 60 days.

If the matter is not resolved to the student's satisfaction by the Compliance Officer, students may request to have the complaint reviewed by a panel of members from the University Community. The panel review committee will launch its own investigation and submit its finding in writing to the Compliance Officer. This finding is final. Within 7 days of receiving the finding, the Compliance Officer must communicate the finding to the student, in writing. If the panel finds that there has been a violation of the University's policy against discrimination, discrimination-related harassment, and sexual harassment has occurred, the Compliance Officer shall take prompt and appropriate remedial action. The resolution recommended by the Compliance Officer is deemed final, binding, and cannot be appealed.

A complete copy of the University's policy against discrimination, discrimination-related harassment, sexual harassment, and related complaint procedures is available in the St. John's University Student Handbook. A copy of this handbook and the University's Policy can be accessed on the St. John's website.

O. University Guidelines Determining Eligibility for Services for Students with Disabilities

St. John's University students who are interested in requesting accommodations for a disability must present documentation of the disability to the Office of Disability Services.

Students diagnosed with physical and/or mental impairments qualify as persons with disabilities when their conditions substantially limit them in one or more major life activities. St. John's University provides reasonable accommodations to students with disabilities with consultation from their academic programs when necessary. Reasonable accommodations are adjustments to policies, practices, or procedures that facilitate equal access and opportunity for students with disabilities to the University's programs, activities and services. Services for students with a documented disability are available through the Office of Disability Services.

The goal of documentation is twofold: to verify and support the student's status as disabled and to address the way in which the disability impairs the student's access to education. The documentation should provide a meaningful understanding of the student's limits and, importantly, detail reasonable accommodations which will effectively equalize the student's ability to perform in the university setting.

All documentation is kept confidential and should be submitted directly to ODS. Students requesting accommodations should schedule an appointment with an ODS administrator and identify their needs as early in their tenure at St. John's as possible.

Guidelines Determining Eligibility for Services:

St. John's University students requesting accommodations for a disability must present verification of eligibility through documentation of the disability and current functional limitations.

An evaluation must have been completed by a qualified, certified and/or licensed professional (physician, health care provider, psychologist and/or psychiatrist) who has experience with an adolescent and adult population. The professional's credentials/licensing information must appear on the documentation.

The evaluator must include in the test report evidence that the instruments selected are reliable and valid for use with an adolescent or adult. Documentation of impairment alone may not be sufficient to require that the student be provided a reasonable accommodation. It must be demonstrated that the impairment rises to the level of a disability according to the Americans with Disabilities Act. For example, the impairment must substantially limit or restrict a major life activity (i.e., learning, reading, concentrating, and/or thinking). The documentation must provide information to support the need for all accommodations requested.

An ODS administrator will evaluate the documentation and requested accommodations. When necessary, specific academic units will be consulted regarding the accommodations. Additional documentation may be required to support the student's request.

Temporary accommodations are considered.

A student having dissatisfaction with the decision for accommodation granted has the right to appeal the decision in accordance with the University's "Policy Against Discrimination and

Sexual Harassment and Related Grievance Procedures."

An ODS administrator may be contacted for information regarding specific documentation required or for explanation of this policy.

P. International Students

All foreign students whose native language is not English must take the Test of English as a Foreign Language (TOEFL) and have the official results sent directly to St. John's (the code for St. John's, Queen's Campus is #2799). Applicants who meet other admissions criteria but have TOEFL scores that fall below the University standards may be conditionally accepted contingent upon completion of The Language Connection (TLC). Note that no course credits are awarded for the TLC.

Q. Grievance Policy

The School Psychology Program's grievance procedures are as follows:

1. If a student has a grievance with faculty, staff, or another student associated with the program, the student should meet first with the person who is believed to be responsible for the grievance in an attempt to resolve the problem informally. The department believes that many student concerns can be resolved through direct and open communication between the parties concerned.
2. If the student is not satisfied with the results of the informal meeting or is not comfortable communicating directly with the person with whom he or she has a grievance, then the student should arrange a meeting with another faculty member or the Program Director.
3. If the student grievant is dissatisfied with the results of Step 2 (meeting with their faculty advisor or the Program Director), s/he should request a meeting with the Chair of the Psychology Department. If necessary, the Department Chair might schedule a joint meeting with the grievant and the individual with whom the grievance is directed within ten working days.
4. If the student is not satisfied with the results of the meeting with the department chair, he or she may submit a written complaint to the GEPC, along with a request for a meeting with the GEPC. All students are informed as to who the faculty members are of the GEPC at the beginning of each academic year. The written grievance should be presented promptly to the GEPC and prior to the scheduled meeting. After the student meets with the GEPC, the Department Chair will return a written response to the student grievant within ten working days. If the grievance is resolved, a copy of the written resolution will be included in the student's file.
5. If either party is dissatisfied with the results of Step 4, s/he may appeal in writing to the Dean of St. John's College within ten working days from the date of the Step 4 response. Upon receipt of the appeal, the Dean will schedule a meeting with the grievant and the

individual with whom the grievance is directed within ten working days. A written response will be issued to both parties within fifteen working days. The Step 5 decision shall be deemed final and binding. A copy of the final grievance and results will be maintained in the student's file.

R. Remediation Policy: Handling & Remediating Student Difficulties

The procedures for the handling and remediation of any noted difficulties in progress will be communicated directly to the student as follows: Progress is reviewed annually at a meeting of the entire program faculty. The faculty rate student academics, clinical skills, interpersonal skills, and responsibility. If necessary, faculty will review student transcripts and supervisor feedback in making a determination regarding performance and overall progress in the program. The findings of the student review are documented in a letter to the student stating if they are making satisfactory progress. If the student is not making progress as expected, they are instructed to meet with a member of the core faculty or the Program Director to discuss methods for improvement of performance.

Faculty also monitor student progress in an ongoing manner via performance in coursework or supervision in practica during each semester. Ongoing monitoring provides an opportunity to address concerns that may arise suddenly without having to wait until the annual review. The manner in which any identified concerns or problems are managed is as follows: If an ongoing review indicates particular concerns or unsatisfactory progress in any area, it is required that the faculty advisors arrange a meeting with the student to discuss the issues that have been noted. If, in the opinion of the faculty advisor or faculty as a whole, the concerns warrant formal action or remediation, a recommended improvement plan will be developed jointly by the student and, as appropriate, in consultation with any faculty members familiar with the areas in which the difficulties are noted. The plan will be given to the student in writing by the faculty advisor and offered as a recommendation for improving performance. In the event that satisfactory progress is not attained by the next scheduled review or end of the semester, the faculty will meet and develop a new recommended improvement plan, jointly. The relevant faculty member will again meet with the student and present the plan, which may include, but is not limited to, repeating coursework, delays in starting intern/externships, extra-curricular training, or termination from the program.

Exceptions to these procedures are allowed in cases where students have engaged in particularly egregious conduct, for example ethical or legal misconduct, actual or threatened physical or verbal aggression, academic dishonesty, and the like, in which case a student may be referred by any faculty member directly to the appropriate administrative level to face disciplinary actions in accordance with university policies.

IV. STRUCTURE OF THE SCHOOL PSYCHOLOGY PROGRAM

A. Schedule for Full-Time Students: General Track

FIRST YEAR FALL SEMESTER

603 - Statistical Design in Research	3 credits
603L - Statistical Design in Research Lab	0 credits
661 - Psychoeducational Assessment I	3 credits
661L - Psychoeducational Assessment I Lab	0 credits
665 - Introduction to School Psychology	3 credits
666 - Interviewing Skills for Counseling and Consultation	3 credits
(Total credits after the first semester - 12 credits)	

FIRST YEAR SPRING SEMESTER

648 - Physiological Psychology	3 credits
662 - Psychoeducational Assessment II	3 credits
662L - Psychoeducational Assessment II Lab	0 credits
620 - Cognitive Psychology of Academic Learning	3 credits
671 - Child & Adolescent Personality Assessment	3 credits
(Total credits after the first year - 24 credits)	

FIRST YEAR SUMMER SEMESTER (optional)

761 - Psychological Assessment Practicum I ¹	3 credits
---	-----------

SECOND YEAR FALL SEMESTER

659 - Psychological Measurement & Scaling	3 credits
Either 726 - Psychopathology Across the Lifespan I	3 credits
Or 727 - Psychopathology Across the Lifespan II	
761 - Psychological Assessment Practicum I ²	3 credits
716 - Psychoeducational Consultation	3 credits
627 - Cultural Diversity	3 credits
(39 credits)	

SECOND YEAR SPRING SEMESTER

715 - Assessment, Diagnosis, & Remediation of Learning Disabilities	3 credits
623 - Developmental Psychology	3 credits
749 - Behavior Therapy: Assessment, Treatment & Consultation	3 credits
Either 727 - Psychopathology Across the Lifespan II	3 credits
Or 726 - Psychopathology Across the Lifespan I	
762 - Psychological Assessment Practicum II ²	3 credits

¹ Students may take 761 in the summer following the completion of their first year of studies in order to assist with satisfying the testing case requirement. Students who register for 761 in the summer will register for 762 in the fall of their second full time year.

² Students will work in the Center for Psychological Services and Clinical Studies and other university approved sites for external practica.

(Total credits after the second year - 54 credits)

THIRD YEAR FALL SEMESTER

615 - Research Methods in School Psychology	3 credits
752 - School Psychology Internship Seminar I: Professional Issues ³	3 credits
	(60 Credits)

THIRD YEAR SPRING SEMESTER

105-Comprehensive Examination	0 credits
Elective	3 credits
753 - School Psychology Internship Seminar II: Psychological Interventions ³	3 credits

(Total credits after the third year - 66 credits)

The Praxis School Psychologist Examination and the Comprehensive Examination are taken during this year.

Students will receive the Master of Science degree in School Psychology at the end of the third year if they pass the Praxis School Psychologist Examination and the Comprehensive Examination.

B. Schedule for Part-Time Students: General Track

FIRST YEAR FALL SEMESTER

665 - Introduction to School Psychology	3 credits
661 - Psychoeducational Assessment I	3 credits
661L - Psychoeducational Assessment I Lab	0 credits
	(6 credits)

FIRST YEAR SPRING SEMESTER

620 - Cognitive Psychology of Academic Learning	3 credits
662 - Psychoeducational Assessment II	3 credits
662L - Psychoeducational Assessment II Lab	0 credits

(Total credits after the first year - 12 credits)

SECOND YEAR FALL SEMESTER

603 - Statistical Design in Research	3 credits
603L - Statistical Design in Research Lab	0 credits

³ Students will be required to spend five days per week in a school setting working under a Certified School Psychologist who is also a Licensed Psychologist.

666 - Interviewing & Case Formulation 3 credits
(18 credits)

SECOND YEAR SPRING SEMESTER

648 - Physiological Psychology 3 credits
671 - Child & Adolescent Personality Assessment 3 credits
(Total credits after the second year - 24 credits)

THIRD YEAR FALL SEMESTER

623 - Developmental Psychology 3 credits
Either 726 - Psychopathology Across the Lifespan I 3 credits
Or 727 - Psychopathology Across the Lifespan II
761 - Psychological Assessment Practicum I¹ 3 credits
(33 credits)

THIRD YEAR SPRING SEMESTER

715 - Assessment, Diagnosis and Remediation of Learning Disabilities 3 credits
Either 727 - Psychopathology Across the Lifespan II 3 credits
Or 726 - Psychopathology Across the Lifespan I
762 - Psychological Assessment Practicum II¹ 3 credits
(Total credits after the third year - 42 credits)

FOURTH YEAR FALL SEMESTER

716 - Psychoeducational Consultation 3 credits
659 - Psychological Measurement & Scaling 3 credits
(48 credits)

FOURTH YEAR SPRING SEMESTER

749 - Behavior Therapy: Assessment, Treatment and Consultation 3 credits
627 - Cultural Diversity in Psychological Services 3 credits
(Total credits after the fourth year - 54 credits)

FIFTH YEAR FALL SEMESTER

615 - Research Methods in School Psychology 3 credits
752 - School Psychology Internship Seminar I: Professional Issues² 3 credits
(60 credits)

¹Students will work in the Center for Psychological Services & Clinical Studies.

² Students will be required to spend five days per week in a school setting working under a Certified School Psychologist who is also a Licensed Psychologist.

FIFTH YEAR SPRING SEMESTER

105 – Comprehensive Examination	0 credits
Elective	3 credits
753 - School Psychology Internship Seminar II: Psychological Interventions ¹	3 credits

(Total credits after the third year - 66 credits)

The Praxis School Psychologist Examination and the Comprehensive Examination are taken during this semester.

Students will receive the Master of Science degree in School Psychology at the end of the third year if they pass the Praxis School Psychologists Examination and the Comprehensive Examination.

C. Bilingual Program

The curriculum requirements for the bilingual school psychology program meets the requirements for the Bilingual Certification by the NYS Education Department in the following manner:

Twelve courses (36 credits) in the general school psychology program are also required of students in the bilingual program.

The following four courses in the program were altered to reflect material required by the New York State Department of Education for Bilingual Certification:

- a. Developmental Psychology (PSY 624) includes extensive discussion of cross-cultural perspectives in child development.
- b. Interviewing and Case Formulation (PSY 666) includes readings in counseling and interviewing culturally diverse children.
- c. Child and Adolescent Personality Assessment I (PSY 671) includes instruction on the use of personality tests and their standardization with African American and Hispanic youth.
- d. School Psychology Internship Seminar I (PSY 752B) includes instruction on the State Education Department's regulations concerning the assessment and placement of bilingual children.

Practicum I & II (PSY 761B & 762B) provides students in their second year (prior to their internship) practicum experience in serving bilingual children and their families. These courses are similar in structure to the courses taken by the regular school psychology program (PSY 761 & 762), except that students in these courses are typically supervised by a bilingual school

psychologist and are trained to provide school psychological services to bilingual children and their families.

Three courses (9 credits) are also required for students in the bilingual program. These include: "Psychoeducational Assessment of Culturally and Linguistically Diverse Children" (PSY 662B), "Cultural Diversity in Psychological Services" (PSY 627), and "Psycholinguistics and the Practice of School Psychology with Bilingual Populations" (PSY 729).

Certification as a Bilingual Psychologist. To obtain certification as a bilingual school psychologist in NY State, a student must take and pass the Bilingual Education Assessment (BEA). It is the student's responsibility to register for this exam on his/her own. The BEA assesses knowledge and skills in the foundations of bilingual education, listening and reading comprehension, and written and oral expression. Offered in the target language of the certificate extension sought, it consists of multiple-choice questions, audiotaped listening and speaking components in English and the target language and reading and writing components in the target language. For more information about the New York State Teacher Certification Examinations, including online test registration, study guides, testing schedules, and more, go to: www.nystce.nesinc.com.

Enrollment in the Bilingual Track. Students must obtain approval from the Program Director to enroll in the bilingual track. This decision must be made prior to the 2nd semester in the program (during the Fall of the 1st year). Enrollment in the bilingual track is not contingent upon passing the BEA. Students are expected to take the BEA exam only if they want to receive the bilingual credential in New York State. Those who chose not to take the BEA can still utilize the bilingual training in their practice as school psychologists.

1. Schedule for Full-time Students: Bilingual Track

The course of study for the Bilingual Track of the Master's of Science program in School Psychology appears below.

FIRST YEAR FALL SEMESTER

603 - Statistical Design in Research	3 credits
603L - Statistical Design in Research Lab	0 credits
661 - Psychoeducational Assessment I	3 credits
661L - Psychoeducational Assessment I Lab	0 credits
665 - Introduction to School Psychology	3 credits
666 - Interviewing Skills for Counseling and Consultation	3 credits
	(12 credits)

FIRST YEAR SPRING SEMESTER

648 - Physiological Psychology	3 credits
620 - Cognitive Psychology of Academic Learning	3 credits
671 - Child & Adolescent Personality Assessment	3 credits
662B - Psychoeducational Assessment of Culturally and Linguistically Diverse Children	3 credits

662L - Psychoeducational Assessment II Lab 0 credits
(Total credits after first year - 24 credits)

FIRST YEAR SUMMER SEMESTER (optional)

761B – Psychological Assessment Practicum I – Bilingual³ 3 credits

SECOND YEAR FALL SEMESTER

659 - Psychological Measurement & Scaling 3 credits

Either 726 - Psychopathology Across the Lifespan I 3 credits

Or 727 - Psychopathology Across the Lifespan II

716 - Psychoeducational Consultation 3 credits

729 - Psycholinguistics & the Practice of School Psychology with 3 credits

Culturally and Linguistically Diverse Populations

761B - Psychological Assessment Practicum I - Bilingual⁴ 3 credits

(39 credits)

SECOND YEAR SPRING SEMESTER

715 - Assessment, Diagnosis, & Remediation of Learning Disabilities 3 credits

623 - Developmental Psychology 3 credits

749 - Behavior Therapy: Assessment, Treatment & Consultation 3 credits

Either 727 - Psychopathology Across the Lifespan II 3 credits

Or 726 - Psychopathology Across the Lifespan I

762B - Psychological Assessment Practicum II – Bilingual² 3 credits

(Total credits after the second year - 54 credits)

THIRD YEAR FALL SEMESTER

615 - Research Methods in School Psychology 3 credits

752B - Bilingual School Psychology Internship Seminar I: 3 credits

Professional Issues – Bilingual⁵

(60 Credits)

THIRD YEAR SPRING SEMESTER

627 - Cultural Diversity in Psychological Services 3 credits

753 - School Psychology Internship Seminar II: Psychological 3 credits

Interventions³

(Total credits after the third year - 66 credits)

The Praxis School Psychologist Examination and the Comprehensive Examination are taken during this semester.

³ Students may take 761 in the summer following the completion of their first year of studies in order to assist with satisfying the testing case requirement. Students who register for 761 in the summer will register for 762 in the fall of their second full time year.

⁴ Students will work in the Center for Psychological Services and Clinical Studies for this Practicum.

⁵ Students will be required to spend five days per week in a school setting working under a Certified School Psychologist who is also a Licensed Psychologist.

Students will receive the Master of Science degree in School Psychology at the end of the third year if they pass the Praxis School Psychologists Examination and the Comprehensive Examination.

2. Schedule for Part-Time Students: Bilingual Track

FIRST YEAR FALL SEMESTER

665 - Introduction to School Psychology	3 credits
661 - Psychoeducational Assessment I	3 credits
661L - Psychoeducational Assessment I Lab	0 credits
	(6 credits)

FIRST YEAR SPRING SEMESTER

620 - Cognitive Psychology of Academic Learning	3 credits
662B - Psychoeducational Assessment of Culturally and Linguistically Diverse Children	3 credits
662L - Psychoeducational Assessment II Lab	0 credits
	(Total credits after first year - 12 credits)

603 - Statistical Design in Research	3 credits
603L – Statistical Design in Research Lab	0 credits
666 - Interviewing Skills for Counseling and Consultation	3 credits
	(18 credits)

SECOND YEAR SPRING SEMESTER

648 - Physiological Psychology	3 credits
671 - Child & Adolescent Personality Assessment	3 credits
	(Total credits after the second year - 24 credits)

THIRD YEAR FALL SEMESTER

659 - Psychological Measurement & Scaling	3 credits
Either 726 - Psychopathology Across the Lifespan I	3 credits
Or 727 - Psychopathology Across the Lifespan II	
761B - Psychological Assessment Practicum I - Bilingual ⁶	3 credits
	(33 credits)

THIRD YEAR SPRING SEMESTER

715 - Assessment, Diagnosis and Remediation of Learning Disabilities	3 credits
Either 727 - Psychopathology Across the Lifespan II	3 credits
Or 726 - Psychopathology Across the Lifespan I	
762B - Psychological Assessment Practicum II – Bilingual ¹	3 credits
	(Total credits after the third year - 42 credits)

FOURTH YEAR FALL SEMESTER

⁶ Students will work in the Center for Psychological Services and Clinical Studies for this Practicum.

623 - Developmental Psychology	3 credits
716 - Psychoeducational Consultation	3 credits
	(48 credits)

FOURTH YEAR SPRING SEMESTER

749 - Behavior Therapy: Assessment, Treatment and Consultation	3 credits
627 - Cultural Diversity in Psychological Services	3 credits
	(Total credits after the fourth year - 54 credits)

FIFTH YEAR FALL SEMESTER

615 - Research Methods in School Psychology	3 credits
752B - Bilingual School Psychology Internship Seminar I: Professional Issues – Bilingual ⁷	3 credits
	(60 credits)

FIFTH YEAR SPRING SEMESTER

753 - School Psychology Internship Seminar II: Psychological Interventions ¹	3 credits
729 - Psycholinguistics and the Practice of School Psychology with Culturally and Linguistically Diverse Populations	3 credits

(Total credits after the fifth year - 66 credits)

The Praxis School Psychologist Examination and the Comprehensive Examination are taken during this semester.

Students will receive the Master of Science degree in School Psychology at the end of the third year if they pass the Praxis School Psychologists Examination and the Comprehensive Examination.

D. Description of Required Courses

603 STATISTICAL DESIGN IN RESEARCH

This course is designed to give those students who will be primarily consumers, as opposed to conductors, of research. The course involves both a review of basic concepts in statistics and an introduction to the methods typically used in contemporary research such as analysis of variance, correlation, and regression. By the conclusion of the course, students will have the ability to critically evaluate the results and conclusions communicated in scholarly work in various fields of psychology. Credit: 3 semester hours.

608 STATISTICAL DESIGN IN RESEARCH

This course concentrates on the use of advanced parametric techniques in the statistical design of experiments. Emphasis is placed on the different models of analysis of variance from one-way to split-plot designs. The conceptual framework of the general linear model is emphasized. This

⁷ Students will be required to spend five days per week in a school setting working under a Certified School Psychologist who is also a Licensed Psychologist.

course is not required for masters students, however students who wish to apply to the doctoral program may take this course instead of 603, as 608 is a required course for doctoral students. If a masters student opts to take 608 instead of 603, they must also complete 614 in order to receive credit. Credit: 3 semester hours.

614 MULTIVARIATE ANALYSIS FOR PSYCHOLOGICAL RESEARCH

Prerequisite: 608 with grade of “B” or higher. The purpose of this course is to present the student with a variety of multivariate research designs along with their appropriate statistical techniques which have application in experimental and clinical research settings. Topics include matrix algebra, multiple regression, factor analysis, discriminant analysis, logistic regression, introduction to multivariate analysis of variance, and introduction to path analysis and structural equation modeling. This course is not required for masters students, however students who choose to take 608 instead of 603 must also enroll in 614 in order to receive credit. Credit: 3 semester hours.

615 RESEARCH METHODS IN SCHOOL PSYCHOLOGY

This course is a survey of the research methods and statistical techniques used in the study of children and their development. Special emphasis will be given to the type of research questions asked by the school psychologist (e.g., program evaluation, assessment techniques, etc.). Students are encouraged to take this course during their first or second year in summer session in order to begin dissertation research preparation. Credit: 3 semester hours.

620 COGNITIVE PSYCHOLOGY OF ACADEMIC LEARNING

An examination of the theory, research and application concerning the cognitive processes that underlie children’s development of mathematical thinking, reading comprehension and study skills. Principles that underlie the assessment strategies and effective teaching and learning of math and reading are discussed.

622 SOCIAL PSYCHOLOGY

An integration and evaluation of the contributions to psychology from psychologists, sociologists, and anthropologists. Social influences on personality development, attitudes, group behavior, and prejudices are discussed. Credit: 3 semester hours.

623 DEVELOPMENTAL PSYCHOLOGY

An overview of the major issues of contemporary developmental psychology from a life-span perspective. Particular emphasis is placed on relevant historical antecedents, theory, core conceptual issues, emerging methodology, major research projects, and selected research findings. Credit: 3 semester hours.

627 CULTURAL DIVERSITY IN PSYCHOLOGICAL SERVICES

A course in diverse cultural perspectives which explores the cultural similarities and differences between psychologist and client and the way these factors affect the delivery of psychological services. Credit: 3 semester hours.

648 PHYSIOLOGICAL PSYCHOLOGY

Neuroanatomy plus readings and discussion of recent research with emphasis on sensory coding, neural bases of learning, and physiological bases of a variety of psychological disorders. Credit: 3 semester hours.

659 PSYCHOLOGICAL MEASUREMENT AND SCALING

Theories of measurement, scaling, and test construction in psychology, including issues of validity and reliability. Scaling models are discussed in relation to attitudes, abilities, psychophysics, and psychometrics. Credit: 3 semester hours.

661 PSYCHOEDUCATIONAL ASSESSMENT I

Administration, scoring, theoretical interpretation, psychometric and qualitative characteristics, and comparative analysis of contemporary scales of intelligence and cognitive ability test batteries serve as the basis for this course. Emphasis will be placed on understanding the role of theory as a foundation for conceptualizing all aspects of assessment, as well as integrating and compiling test results in a psychological report. Test Fee: \$100. Credit: 3 semester hours.

662 PSYCHOEDUCATIONAL ASSESSMENT II

Prerequisite: PSY 661 with grade of "B" or higher. Advanced issues in administration, scoring, theoretical interpretation, psychometric and qualitative characteristics, and comparative analysis of both contemporary cognitive and academic ability test batteries form the major components of this course. Emphasis will be placed on an integrated approach to assessment, particularly, learning disability determination, report writing, and interpreting data from cognitive and achievement batteries from contemporary theoretical perspectives. Test Fee: \$100. Credit: 3 semester hours.

662B PSYCHOEDUCATIONAL ASSESSMENT OF CULTURALLY AND LINGUISTICALLY DIVERSE CHILDREN

Prerequisite: PSY 661 with grade of "B" or higher. Administration, scoring, theoretical interpretation, and psychometric and qualitative comparative analysis of newer cognitive, achievement, and special purpose test batteries - including those available in languages other than English. The use of these tests with bilingual children will be emphasized. Research on the use of standardized tests with culturally and linguistically diverse children will be reviewed and nondiscriminatory assessment strategies will be discussed. Emphasis will be placed on report writing and interpreting cognitive batteries from contemporary theoretical perspectives and the child's cultural and linguistic background. Test Fee: \$100. Credit: 3 semester hours.

665 INTRODUCTION TO SCHOOL PSYCHOLOGY

A general understanding of the various roles and functions of the school psychologist. Introducing the profession of school psychology from a historical, scientific, and practical perspective. Credit: 3 semester hours.

666 INTERVIEWING SKILLS FOR COUNSELING AND CONSULTATION

An understanding of psychopathology and psychodynamics as a foundation for the psychological interview and as a basis for counseling. Following an historical perspective of the field, general principles of interviewing are considered, and practice is gained in the interview for diagnostic assessment. Credit: 3 semester hours.

671 CHILD AND ADOLESCENT PERSONALITY ASSESSMENT

Strategies for assessing child and adolescent personality will be explored. Emphasis will be placed on those projective and objective techniques utilized in the field. A practicum (PSY 761) will accompany this course. Credit: 3 semester hours. Practicum fee: 3 graduate credits.

715 ASSESSMENT, DIAGNOSIS, AND REMEDIATION OF LEARNING DISABILITIES

Prerequisite: PSY 661, 662 with grade of "B" or higher. A systematic study of the psychoneurology of learning disorders of children; classification of learning disorders; receptive, expressive, and central disorders of learning; and assessment of diagnostic procedures. Credit: 3 semester hours.

716 PSYCHOEDUCATIONAL CONSULTATION

This course presents essential information about what a school psychologist needs to be an effective consultant and change agent within the school environment. Students are introduced to a variety of topics related to school-based consultation with families, educators, and other personnel within the school system. Programs and interventions used to address the prevention, correction and remediation of existing social-emotional and academic concerns are presented with an emphasis on a behavioral orientation. Students learn about the process of collaborative consultation, the nature and structure of the school system, and the importance of working with family and community members as part of a multidisciplinary service delivery model. Credit: 3 semester hours.

726 PSYCHOPATHOLOGY ACROSS THE LIFESPAN I

An overview of the biological, developmental, socio-cultural, psychodynamic development, and behavioral determinants of psychopathology in children. Special attention will be given to the relevance of the concepts presented in this course in relation to the work of the school psychologist. Credit: 3 semester hours.

727 PSYCHOPATHOLOGY ACROSS THE LIFESPAN II

The course pursues a discussion of further diagnostic categories not included in Psychopathology of Childhood and Adolescence I, such as developmental disorders, communication and learning problems, organic disorders with a large psychological component, psychosomatic and physical handicaps, and anti-social behavior. There is some discussion of the problems of differential diagnostic assessment based on DSM IV and treatment of behavior disorders in children. Credit: 3 semester hours.

729 PSYCHOLINGUISTICS AND THE PRACTICE OF SCHOOL PSYCHOLOGY WITH CULTURALLY AND LINGUISTICALLY DIVERSE POPULATIONS

This course will provide the student with an understanding of normal language development, second language acquisition, and the problems in delivering school psychological services to bilingual children. Students will be taught to differentiate between language difficulties encountered in acquiring a second language from language "deficits" or disorders. Credit: 3 semester hours.

749 BEHAVIOR THERAPY: ASSESSMENT, TREATMENT, AND CONSULTATION

This course is aimed at providing a theoretical and practical understanding of the behavioral

orientation to psychological assessment and intervention with school-aged children and adolescents in school settings. The course deals with the scientific principles underlying behavior therapy intervention, the clinical application of the procedures in both direct service and indirect consultation models of service delivery, and the empirical support for the efficacy of such procedures. Credit: 3 semester hours.

752 SCHOOL PSYCHOLOGY INTERNSHIP SEMINAR I: PROFESSIONAL ISSUES

Prerequisites: Completion of PSY 762 or 762B. Students with a failing grade or a grade of IN (incomplete), will be dropped from the roster. The ethical standards of the American Psychological Association, the National Association of School Psychologists, and legislative and case law effecting educationally handicapped children will be discussed in detail. Legal issues affecting and impacting the practice of psychology and standards of professional practice will also be presented. The New York State Child Abuse reporting laws and professionals' responsibility under this law will also be presented. Students are assigned to a public or private school providing services for regular education children for a minimum of three full days/week. Students will work under the supervision of a psychologist who is licensed and certified as a school psychologist. Students will make presentations on their field placement activities and discuss the ethical implications of their cases. Credit: 3 semester hours.

752B BILINGUAL SCHOOL PSYCHOLOGY INTERNSHIP SEMINAR I: PROFESSIONAL ISSUES BILINGUAL

Prerequisite: PSY 761B & 762B. Students with a failing grade or a grade of IN (incomplete), will be dropped from the roster. Classroom presentations will focus on recent advances in assessment and intervention strategies for working with linguistically diverse children. Topics to be discussed include, models of school psychology service delivery, interviewing, assessment, intervention, and consultation with culturally and linguistically diverse children. Other topics to be covered include, crisis intervention strategies for school psychologists and kindergarten screening programs. The New York State Department of Social Services curriculum on Child Abuse and additional information on the assessment and treatment of abused children will be presented. Students are assigned to a public or private school providing psychological services to regular education bilingual children and/or adolescents for a minimum of three full days/week. Students will work under the supervision of a psychologist who is licensed and certified as a school psychologist. Students will make presentations on their field placement activities, discuss the roles and functions of school psychologists, and discuss any ethical and legal issues that arise in each case. Credit: 3 semester hours.

753 SCHOOL PSYCHOLOGY INTERNSHIP SEMINAR II: PSYCHOLOGICAL INTERVENTIONS

Prerequisite: PSY 752. Classroom presentations will focus on recent advances in assessment and intervention strategies for school psychologists such as, models of service delivery in school psychology, crisis intervention strategies for school psychologists, kindergarten screening programs, and parent, teacher, and organizational consultation. The New York State Department of Social Services' curriculum on Child Abuse and additional information on the assessment and treatment of abused children will be presented. Students are assigned to a public or private school providing psychological services to regular education children and/or adolescents for a minimum of three full days/week. Students will work under the supervision of a psychologist

who is licensed and certified as a school psychologist. Students will make presentations on their field placement activities, discuss the roles and functions of school psychologists, and discuss ethical and legal issues that arise in each case. Credit: 3 semester hours.

761 PSYCHOLOGICAL ASSESSMENT PRACTICUM I

Prerequisite: PSY 661 and PSY 662 with grade of “B” or higher.

This course includes both classroom presentations (in a seminar style) and completion of psychological assessments of children, adolescents, and young adults. The assessments will be conducted at the University’s Center for Psychological Services and Clinical Studies and/or schools serviced by the Center's staff. Prior to meeting with a parent or child, students will consult with their instructor to determine the assessment strategy and instruments to be used. For each case, students will perform an assessment, develop a case formulation, construct treatment recommendations, prepare a written report, provide a feedback conference to the appropriate person(s), and present any ethical or legal issues that arise. All of these activities are done under the supervision of the instructor who will be a licensed and certified school psychologist. Students will be graded on their diagnostic/assessment skills, interpersonal relations, and professional conduct. Credit: 3 semester hours.

761B PSYCHOLOGICAL ASSESSMENT PRACTICUM I - BILINGUAL

Prerequisite: PSY 661 and PSY 662 with grade of “B” or higher.

This course includes both classroom presentations (in a seminar style) and completion of psychological assessments of bilingual and mono-lingual children, adolescents, and young adults. The assessments will be conducted at the University’s Center for Psychological Services and Clinical Studies and/or schools serviced by the Center's staff. Prior to meeting with a parent or child, students will consult with their instructor to determine the assessment strategy and instruments to be used. For each case, students will perform an assessment, develop a case formulation, construct treatment recommendations, prepare a written report, provide a feedback conference to the appropriate person(s), and present any ethical or legal issues that arise. All of these activities are done under the supervision of the instructor who will be a licensed and certified school psychologist. Students will be graded on their diagnostic/assessment skills, interpersonal relations, and professional conduct. Credit: 3 semester hours.

762 PSYCHOLOGICAL ASSESSMENT PRACTICUM II

This course is a continuation of 761. It includes both classroom presentations (in a seminar style) and completion of psychological assessments of children, adolescents, and young adults. The assessments will be conducted at the University’s Center for Psychological Services and Clinical Studies and/or schools serviced by the Center's staff. Prior to meeting with a parent or child, students will consult with their instructor to determine the assessment strategy and instruments to be used. For each case, students will perform an assessment, develop a case formulation, construct treatment recommendations, prepare a written report, provide a feedback conference to the appropriate person(s), and present any ethical or legal issues that arise. All of these activities are done under the supervision of the instructor who will be a licensed and certified school psychologist. Students will be graded on their diagnostic/assessment skills, interpersonal relations, and professional conduct. Credit: 3 semester hours.

762B PSYCHOLOGICAL ASSESSMENT PRACTICUM II - BILINGUAL

This course is a continuation of 761B. It includes both classroom presentations (in a seminar style) and completion of psychological assessments of bilingual and mono-lingual children, adolescents, and young adults. The assessments will be conducted at the University's Center for Psychological Services and Clinical Studies and/or schools serviced by the Center's staff. Prior to meeting with a parent or child, students will consult with their instructor to determine the assessment strategy and instruments to be used. For each case, students will perform an assessment, develop a case formulation, construct treatment recommendations, prepare a written report, provide a feedback conference to the appropriate person(s), and present any ethical or legal issues that arise. All of these activities are done under the supervision of the instructor who will be a licensed and certified school psychologist. Students will be graded on their diagnostic/assessment skills, interpersonal relations, and professional conduct. Credit: 3 semester hours.

E. Electives

Electives in the **Psychology Department** include the following:

PSY 606 Perception I
PSY 607 Perception II
PSY 616 Principles of Learning
PSY 619 Multivariate Statistics
PSY 626 Psychology of Women
PSY 631 Psychoanalytic Psychotherapy I
PSY 696 Independent Research
PSY 717 Instructional Assessment and Academic Interventions
PSY 745 Applied Behavior Analysis
PSY 751 Interventions with Developmental Disabilities
PSY 760 Marital and Family Therapy
PSY 835 Neuropsychological Assessment
PSY 838 Addictive Behavior
PSY 839 Forensic Psychology
PSY 845 Group Therapy
PSY 850 Cognitive Psychotherapies
PSY 861 Psychopharmacology
PSY 862 Independent Study (applicable only to concentration F - Psychological Research)

Students can take electives outside of the psychology department with the approval of the Program Director or their advisor. Any graduate course in the University can be an elective. The core School Psychology Faculty have reviewed the course offerings and recommend that electives outside the Psychology Department be chosen from the following list.

Department of Sociology & Anthropology

SOC 117 Family Violence
SOC 119 Juvenile Delinquency
SOC 131 Sociology of Youth
SOC 147 Personality, Culture and Society

SOC 150 Sociology of Illness & Health Care
SOC 227 Criminology
SOC 249 Sociological Perspectives on Education

Department of Speech, Communication Science, & Theater

SPEECH 203 Models of Language and Behavior
SPEECH 318 Developmental Language Disorders
SPEECH 320 Language Based Learning Disabilities
SPEECH 321 Speech Language Assessment & Intervention for Infants, Toddlers, and the
Preschool Child
SPEECH 329 Neuroanatomy and Neuropathology of the Speech System.

**School of Education & Human Services Division of Administrative & Instructional
Leadership**

Courses in Educational Administration

EDU 5415 Introduction to Educational Administration
EDU 5418 Administrative Theory in Education
EDU 5471 Leadership in Instructional Supervision
EDU 5571 Administrative Leadership
EDU 5791 Legal Aspects of the Administration of Schools
EDU 5795 Student & Teacher Rights in Administration of Schools
EDU 5811 Administration & Supervision of Special Education Services
EDU 7232 Individualization: Prescribing for Student Learning Styles

Department of Human Services & Counseling

Courses in Reading

EDU 3230 Diagnosis & Recommendations for Literacy Performance
EDU 3240 Literacy and Assessment Strategies for Diverse Learners
EDU 3264 Teaching Literacy through Literature (Birth through Grade 6) in General and
Inclusive Settings
EDU 3270 Theories of and Strategies for Teaching Literacy in the Content Areas
EDU 3274 Innovative Approaches to Thinking and Literacy Development for the Gifted Learner
EDU 3278 Curriculum and Instructional Design for Teaching Literacy to Individuals with
Exceptionalities B-12
EDU 5420 Politics of Education
EDU 5651 School-Community Relations in Education
EDU 5741 Finance of Education

Applied Behavior Analysis Program

St. John's School Psychology Program includes a 24-credit **Verified Course Sequence (VCS)** approved by **the Behavior Analysis Certification Board (BACB)**. Fifteen of these credit hours are embedded within the school psychology coursework. For students that are interested in pursuing BCBA certification in addition to School Psychology Certification, 15 credit hours required for the BACB are embedded into the school psychology coursework, and the remaining 9 required credits are offered to be taken as additional electives beyond their school (beyond the

credit hours required as part of the school psychology coursework). The breakdown of how the credit hours are incorporated is illustrated in the table below:

School Psychology Program Courses with Embedded BACB Content – These courses are required as part of your course study in school psychology, and the BACB content hours for 15 credits hours is embedded within these courses

Course Course Title

#

PSY 716 Psychoeducational Consultation in the Classroom	3 cr.
PSY 747 Introduction to the Study of Autism Spectrum Disorders	3 cr.
PSY 615 Research Methods in School Psychology	3 cr.
PSY 749 Behavior Therapy: Assessment, Treatment, and Consultation	3 cr.
PSY 752 School Psychology Internship Seminar I	3 cr.

Additional ABA courses to be taken as electives to complete the sequence – These courses are additional electives beyond your course study in school psychology that are required to complete the verified course sequence (VCS) in Applied Behavior Analysis.

Course Course Title

#

PSY 744 Assessment Methods for Students with Autism Spectrum Disorders	3 cr.
PSY 745 Applied Behavior Analysis	3 cr.
PSY 746 Single Case Design for Students with Autism Spectrum Disorder	3 cr.

Completion of these courses ensures that students meet the course requirements for BCBA certification. In order to complete ALL the requirements to become a BCBA, students must independently complete 1500 supervised hours working in the field of applied behavior analysis and pass the BCBA exam. St John's University provides the approved course sequence, but it is the student's responsibility to review the requirements for BCBA certification. Information for certification in behavior analysis can be found at www.bacb.com.

If you have any questions regarding the VCS for Applied Behavior Analysis, contact Dr. Angela Mouzakitis at mouzakia@stjohns.edu.

F. Community Service Commitments

1. Community Service Commitment

St. John's is a Vincentian University, inspired by St. Vincent de Paul's compassion and zeal for service. In the Vincentian tradition, we seek to foster a world view and to further efforts toward global harmony and development by creating an atmosphere in which all may imbibe and embody the spirit of compassionate concern others so characteristic of Vincent. The purpose of the community service program is to provide St. John's Graduate Students in School psychology an opportunity to connect with the local community and provide needed volunteer service to disadvantaged communities that utilize the students' strengths, academic knowledge and skills.

Students enrolled in one of the graduate programs in School Psychology will complete 30 community service hours in their first year of attendance. Part-time students may do so over the

course of two years. Community service activities may be, but are not required to be, related to the field of school psychology. Students may not use a current position through which they are employed for community service hours. Students are required to complete a Community Service Program Contract and Log (see Appendix B), keep a copy of each for themselves, and turn a copy of each in to the Program Secretary.

2. “Brown Bag” Research Presentations

To further provide exposure and conversation about research that is relevant to the field of psychology and profession of school psychology, the faculty of the St. John's University school psychology program provides regularly scheduled research meetings that are required of all first-year doctoral students. However, master's students are encouraged to attend. Faculty will present their research, research of some of their doctoral students, or discuss an emerging area of research in the field.

G. Experiential Learning Coursework

1. First Year Courses

Interviewing Skills for Counseling and Consultation (PSY 666):

Students will learn the process of intake interviewing with children, parents, and teachers to determine the nature of a psychological problem and will receive instruction and supervision in conceptualizing cases. Students will practice interviews with one another, interview parents or teachers, conduct a formal observation of a student, and write case reports based on data.

Psychoeducational Assessment I and II (PSY 661, PSY662, PSY662B):

Students will conduct comprehensive cognitive assessments on volunteer clients. In PSY 661, each student will be required to assess individuals using current psychological tests and instruments. Additionally, students will be required to design and administer three comprehensive assessments following state-of-the-art principles and procedures. Each student will compile the results of these evaluations in a written psychoeducational report. In PSY 662 and 662B, students will assess two individuals using the most current and psychometrically defensible cognitive and achievement test batteries. In addition, each student will design and administer an assessment reflecting current methodology and practice using one or more of the intelligence tests introduced in this course (or PSY 661). The purpose of this assessment is to encourage the use of cross-battery assessment (XBA) procedures that tailor assessments directly to referral concerns and lead directly to relevant interventions. A secondary purpose is to encourage the use of contemporary theory and research in the interpretive process. Each student will compile the results of these evaluations in a written psychoeducational report. Since 662B is designed to be the section for students in the bilingual track, it includes an additional focus on tests that are designed for use with culturally and linguistically diverse populations, and emphasizes nondiscriminatory assessment procedures. Students in PSY 662B will be responsible for conducting a comprehensive assessment of a culturally or linguistically diverse individual.

An assessment lab will supplement each assessment course (i.e., PSY 661 and PSY 662/662B). These labs will meet for one hour each week and are taught by advanced level School Psychology graduate students. In lab, students will gain practical "hands on" experience using

the most recent versions of commonly used psychoeducational assessment tools, including intelligence (IQ), achievement, and special purpose tests. Lab sessions include instruction in the administration and scoring of these tests. To effectively understand the testing process and gain experience in test use, students are required to administer each test to volunteers, who are solicited by the students. A competency exam is administered as part of the labs for both 661 and 662/662B to ensure that students are able to administer and score intelligence and achievement tests accurately. See Appendix K for the University testing kit policy.

2. Second Year Courses

Psychological Assessment Practicum I and II (PSY 761, 762):

During the second-year students will register for two semesters of practicum. The practicum runs as a course with clearly defined weekly meeting times. Students are responsible for attending all meetings and are required to be present for the discussions of all the cases presented by their peers. In total, students are responsible for completing five testing cases across the two semesters (PSY 761, PSY 762) under the supervision of a psychologist. The services provided in the practicum are coordinated by and supervised through the Center for Psychological Services and Clinical Studies. Students are required to complete psychological evaluations in the outpatient clinic maintained by the Center and to provide School Psychological Services to training sites arranged by the Center. Among these, the school provides these services in a variety of inner-city culturally diverse schools that have a working relationship with the Center for Psychological Services. It is the goal of the School Psychology Program and the Center to have students gain experience in diverse settings. Completion of professional responsibilities during practicum and ratings by practicum supervisor will be utilized in determination of course grade.

In order to assist students with satisfying the five testing case requirement, students may opt to start seeing clients over the summer following completion of their first year of studies (must have successfully completed PSY 661 and PSY 662). Students will be assigned a supervisor and will register for PSY 761 on a first-come-first-serve basis.

During the practicum students will acquire the following experiences:

- 1) Students will gain experience with the referral process for clinical and school psychological services.
- 2) Students will gain practical experience in the ethical issues and strategies for resolution of ethical conflicts that may occur in providing psychological services.
- 3) Students will gain experience in choosing the best assessment strategies, inventories, and interviewing techniques to complete a comprehensive psychological evaluation.
- 4) Students will gain experience investigating the reason for referral and the different perspectives from the school administration, teachers, parents and child.
- 5) Students will gain experience administering intellectual, academic, personality, behavioral, family and systemic assessment instruments, and in conducting classroom observations.

- 6) Students will gain experience scoring assessment instruments and integrating findings in a psychological report.
- 7) Students will gain experience developing treatment recommendations and placement recommendations based on the assessment data.
- 8) Students will gain experience writing reports that present, integrate and interpret the assessment data and offer recommendations.
- 9) Students will gain experience providing feedback on the results of their evaluations and recommendations to parents.
- 10) Students will gain experience providing feedback on the results of their evaluations and recommendations to teachers.
- 11) Students will gain experience consulting with parents and teachers.
- 12) Students will gain experience in learning about the community resources that can meet the needs of the child and help carry out the recommendations.
- 13) Students will gain experience communicating their assessment conclusions and recommendations to other agencies.

Behavior Therapy: Assessment, Treatment, & Consultation (PSY749):

This course is aimed at providing a theoretical and practical understanding of the behavioral orientation to psychological assessment and intervention with school-aged children and adolescents in school settings. The course deals with the scientific principles underlying behavior therapy intervention, the clinical application of the procedures in both direct service and indirect consultation models of service delivery, and the empirical support for the efficacy of such procedures.

Psychoeducational Consultation (PSY716):

Students will meet with a volunteer consultee once a week for 30-40 minutes. The consultee should be a family member or school personnel who directly works with the student(s). A minimum of 5 sessions is required. Quality consultation makes use of objective data. Students are encouraged to operationally define problems and collect qualitative and quantitative data to be used in problem analysis and program evaluation. Students will submit weekly logs of their interactions during the consultation sessions, as well as a summary that includes a reaction to the consultation experience.

H. St. John's University Center for Psychological Services

The University's commitment to quality training in professional psychology resulted in the Center for Psychological Services. The Center is located a short distance from campus on Union Turnpike. The Center provides training for students enrolled in the Clinical Psychology and School Psychology programs. Students gain experience providing psychological assessments to

clients in the community or to students at one of the satellite settings. All students must do at least one case per semester in a school placement set up through the Center.

Students will work very closely with their supervisors in all aspects of the assessment process, including consultation with parents and school staff. Students are to refer to their individual course syllabi (PSY 761, 762, 761B, 762B) for the details of the practicum supervision. An important aspect of this training includes an emphasis on the professional growth of the student. Students must always conduct themselves with the utmost professionalism while at the Center and dress and behave in a way that encourages respect. The Ethical Standards for Psychologists established by the American Psychological Association and the Ethical and Religious Directives for Catholic Health Facilities are important guidelines with which to become familiar, as the center upholds these principles.

The practicum supervisors who serve as instructors for the School Psychology practicum courses are school psychologists with relevant experience. The supervisors all have adjunct faculty appointments at St. John's. Each practicum supervisor has a doctoral degree, a State of New York psychology license, and New York State certification as a School Psychologist.

I. Third Year Field Placements (School Psychology Internship)

Prerequisites

Prior to beginning the third-year field placement, students must have completed 54 course credits, which must include the following courses: PSY 603, 620, 659, 661, 662/B, 665, 666, 671, 761/B, 762/B, 726, 727, 715, 716, and 749. In addition, students will not be permitted to begin internship unless they have received a passing grade in their second year practica courses (761/762) and have an overall GPA of 3.0. Further, they must not have any INC grades on their record.

Prior to the start of the third-year field placement, students will undergo a clearance process to review the above criteria and establish their eligibility to begin. This process, conducted by the Field Placement Coordinator, typically occurs in June of the 2nd year, once grades are submitted. Students will not be permitted to begin the third-year field placement if they do not meet these criteria. Prior to submitting their *Third-Year Internship/Externship Site Preference Form* (to be distributed by the Field Placement Coordinator), students will be spoken to and asked to sign a “soft clearance” indicating that they are aware of their program requirements and that they do not presently have and/or anticipate any outstanding program requirements.

In accordance with NYS Law, students must be fingerprinted to begin their third-year field placement. It is recommended that students complete the fingerprinting process in the spring of their second full year. While students may receive specific information from the Field Placement Coordinator or their placement site regarding fingerprinting, comprehensive information regarding the process can be found at <http://www.nysed.gov/educator-integrity/fingerprinting>.

Students must complete their field placement, PSY 752/PSY 753, concurrently. The field

placement experience in the third year is considered an internship by the New York State Teacher's Certification Office that issues the certificate in School Psychology.

To satisfy the third-year field placement requirements, students must work in a school setting five full days per week for two semesters (September-June), which totals 181 days or 1200 clock hours. All internship hours must be completed by the end of St. John's University Spring Semester in order to receive a grade for the course and satisfy graduation requirements. If interns have not completed 1200 hours by that date, they will only be eligible to graduate after completion of internship hours. Interns follow the site's academic calendar for the length of the placement, beginning their work in September and continuing through the end of June. Internship sites may be in urban or suburban schools encompassing either elementary (Kindergarten through 5th Grade), middle (6th through 8th Grade), or high (9th through 12th Grade) school levels. Students must have their placement approved by the Program Director or the Field Placement Coordinator. **Once a student has accepted an internship position verbally or in writing, the student may no longer apply or interview for any other internship opportunities. A decision to leave an internship placement is left to the Field Placement Coordinator in consultation with the Program Director. Such a decision can be made only if an alternate placement will educationally benefit the student.**

Initiation or resignation of any internship/externship without the approval of the Field Placement Coordinator and/or the Program Director may result in delay of placement, the student being placed on probation, or the student being terminated from the program. Students cannot contact an alternate placement or discuss leaving their current placement without first getting the approval of the Field Placement Coordinator and/or the Program Director.

The third-year field placement provides an opportunity for students to exercise their professional skills. During this placement, students' experiences should include all of the following: 1) assessment of children including initial referrals, screenings, and annual and triennial evaluations; 2) teacher and parent consultation; 3) direct and indirect intervention such as individual or group counseling; and 4) participation in student case presentation to the district Committee on Special Education.

Students must complete an internship activity log that documents (a) the precise amount of time spent at the internship site and (b) the types of experiences encountered each day. Currently, students use Time2Track, which is a web-based tracking system. Students must also submit a report showing the monthly summary for all activities to their respective professors in PSY 752 and 753; these monthly summaries can be generated from Time2Track. This is necessary to ensure that the student receives full credit toward the 1200 clock hour requirement. Signatures from both the supervisor and student must appear on each monthly summary record. It is the student's responsibility to keep this log and to have it signed by the supervisor. Failure to keep the log may result in the student not receiving credit for his or her time and an "incomplete" (IN) in the class. Additional time spent after school hours in such activities as report writing and attending school meetings also counts as hours toward the requirements for the field placement. When schools are closed for holidays or breaks, students may assign up to 7 hours of work for each of these days on their internship logs. Students must assign these hours to log categories

that are not dependent upon school being open (e.g., administration, report writing). **All students are restricted to a maximum of 45 hours per week.**

The evaluation of placement sites by the School Psychology Graduate Program is strict and involves great scrutiny and quality control. The procedure normally begins when schools contact the Field Placement Coordinator or Program Director with a request for interns/externs. The department accepts placement sites based on knowledge of the internship/externship supervisor, his or her reputation as a competent and ethical professional among peers in the local community, and his or her holding of a valid license and certification as a School Psychologist. In addition, the Field Placement Coordinator will either visit internship sites or will maintain telephone and email contact throughout the internship.

No later than the beginning of the internship/externship year, the student will provide his or her primary field placement supervisor a contract and planning form (see Appendices C and F). On the planning form, the supervisor and the student meet to outline the tasks and experiences that the student will participate in during the year. The supervisor must indicate (on the planning form) that students (a) will participate in appropriate amounts of consultation, counseling, and assessment, along with other required activities (denoted by an * on the planning form) and (b) will receive a minimum of two hours of direct supervision per week. The supervision must occur on site as the supervisor will have greater familiarity with working in an organized setting such as a school, will know the population, the setting and its policies, and most of all, have access to client records as they cannot be removed from the setting. Both the supervisor and student will also sign a contract outlining their responsibilities. The contract also outlines the supervisor's responsibilities to the student. The student must submit the contract and planning form to the Program Administrative assistant in accordance with the timelines outlined in the *School Psychology Program: Important Due Dates* document published by the Program Director. Please note that training hours cannot be formally accrued without these signed and submitted documents.

At the end of the fall and spring semesters, the supervisors evaluate the students. Supervisors receive the evaluation forms from the Program Administrative assistant. It is imperative that students ensure that the Program Administrative assistant and the Field Placement Coordinator has the correct name and email address of ALL supervisors that are involved in the student's evaluation. If a student has two supervisors, separate evaluations must be submitted by each supervisor. Completion of professional responsibilities while on placement and ratings by the placement supervisor will be utilized in determination of course grade. At the conclusion of the year, students will be asked to complete evaluations of their internship/externship site and supervisor. These forms can be obtained from the Program Administrative assistant. Notwithstanding end of year evaluations, any substantive concerns with a site or supervisor should be immediately brought to the attention of the Field Placement Coordinator.

During the PSY 752/753 course sequence, students discuss legal and ethical issues as well as their placement experiences, including ways in which their school districts deal with typical problems such as crisis intervention, suicidal emergencies, and parents who disagree with CSE recommendations.

Information on School Psychology Certification in all 50 states can be found on the NASP website.

During the third-year field placement, students develop their knowledge and skills in the following areas:

1. Students will become familiar with the various roles of practicing School Psychologists.
2. Students will learn the organizational functioning, administration, implementation of policies, and politics of schools and school districts.
3. Students will gain experience in the process of special education referral, evaluation, placement, and remediation (e.g., developing IEPs, presenting to the district's Committee on Special Education).
4. Students will become knowledgeable about the process of regular education.
5. Students will become acquainted with community resources that support school psychological services.
6. Students will gain experience in various assessment techniques including: initial interviews with children and parents, interviewing parents and teachers to assess the nature of the referral, intellectual assessment, academic assessment, emotional and social assessment, behavioral observation and assessment, classroom observations, and curriculum-based assessment.
7. The student will gain experience and develop competence in clinical diagnostic interviewing.
8. The student will gain experience and develop competence in providing consultation services (i.e., to parents, teachers, and other school personnel).
9. Students will gain experience and develop competence in both regular and crisis intervention skills and/or strategies (e.g., how policies are constructed, carried out, and evaluated).
10. Students will gain experience and become proficient in writing comprehensive psychoeducational reports to articulate their assessments and recommendations.
11. Students will learn to demonstrate accountability for their activities as practicing School Psychologists.
12. Students will learn to evaluate their personal behavior and professional skills and learn to set goals for self-improvement.
13. Students will gain experience in providing feedback on their assessment and

recommendations to children, parents, teachers, and other school personnel.

14. Students will gain experience in counseling school children individually and in groups.

J. Annual Feedback

Each year, the core School Psychology faculty meets to evaluate each student's progress in the program. This is an opportunity to review the students' academic standing, discuss their strengths and areas in which improvement may be required, review their evaluations from practica and externship/internship supervisors, and discuss their overall progress in the program. Students receive written feedback through the Annual Student Progress Report following this meeting. The practica and externship/internship evaluation forms give more specific information about student knowledge and professional skills as compared to the Annual Student Progress Report. The form used for this feedback appears in Appendix G.

K. Praxis School Psychologist Examination

The Praxis School Psychologist Examination is designed for masters and specialist degree level candidates wishing to serve as school psychologists in educational settings.

The Praxis exam (which is a required part of the STJ comprehensive exam taken in the 3rd year) will be changing:

The 2-hour-and-20-minute test contains 140 selected-response items covering four main content areas of the NASP Practice Model:

- Professional Practices, Practices that Permeate All Aspects of Service and Delivery (approximately 42 items)
- Direct and Indirect Services for Children, Families, and Schools (Student-Level Services) (approximately 32 items)
- System-Level Services (approximately 22 items)
- Foundations of School Psychological Service Delivery (approximately 44 items)

Each exam will contain pretest items that do not contribute to the candidate's score.

As recommended by the standard setting panel, the passing score set by NASP for the Praxis is 147 (on a 100-200 reporting scale).

Successful completion of the Comprehensive Examination for the School Psychology program requires that students pass the Praxis exam as well as the other case study portion of the exam described in Section Q. While the Graduate Division of St. John's College only allows two opportunities to pass the case study portion of the competency examination, there are no limits to how many times the student may take the Praxis examination. However, students will not be able to have a degree granted until successful completion of this requirement. Students are permitted to take the Praxis any time after their 1st year in the program. For conferral of the MS degree the student must pass the Praxis by April 15th of their 3rd year in the program. If the student does not

pass this examination while on third year externship, they will not be permitted to start fourth year externship until they pass the exam.

Reporting of results. It is the student's responsibility to ensure that the school psychology program receives an official complete results report of the Praxis examination. These results will be required for each Praxis attempt.

Attending Institution Code: **A2845** St Johns U NY

Designated Score Recipient Code: **RA2799** U NY Marillac

NASP National Code: **R1549** NASP Natl Assoc Sch Psychologists

L. Comprehensive Examination

Both MS and PsyD students are required to take and pass a comprehensive examination, as required by the New York State Education Department. The comprehensive examination has two parts. The Graduate Education Policy Committee of the Psychology Department and the Graduate Division of St. John's College of Arts & Sciences set the policy for this exam. The first part is the *Praxis* School Psychologist Examination. The second part involves three cases study reports, one each in psychological assessment, consultation, and psychological intervention that should represent the students' integration of coursework, knowledge and programmatic training and be reflective of student competency in each of these areas.

Only after the MS degree conferral will the student will be eligible to apply for certification as a School Psychologist via the New York State Education Department (and other states). Students who fail the comprehensive exam will not receive the M.S. degree. Students who fail the comprehensive exam must retake the exam a second time.

1. Eligibility

Students must have completed a minimum of 60 credits by the end of the semester before their comprehensive examination and be registered to have at least 66 credits by the end of the spring of their third full year in the program. Students must be in good academic standing to take the exam (GPA of at least 3.0), must not have any incompletes on their transcript, and must have retaken any necessary coursework that they did not successfully pass. Taking the comprehensive exam, and not having fulfilled these requirements will invalidate the results of the examination. ***It is solely the students' responsibility to ensure they have fulfilled all program requirements prior to taking the comprehensive examination.***

2. Qualifying to Take the Examination

The Program Director will review each 3rd year student's record during the Fall semester preceding the comp examination. If the student meets all criteria to be eligible to take the Comprehensive Examination, the student will then be registered for the zero-credit, PSY 105 Comprehensive Exam course that will list the Program Director as the course instructor. It is important to note, that students with any Incomplete Grade or unfulfilled program requirement

(i.e., not having passed a course) on their academic records will not be permitted to register for the comprehensive exam. If somehow the Program Director and/or the Dean fail to detect an incomplete grade, or unfulfilled program requirement and the student proceeds and takes the comprehensive exam, their results will be invalidated. ***It is solely the students' responsibility to ensure they have fulfilled all program requirements prior to taking the comprehensive examination.***

3. Completing the Examination

I. **PRAXIS.** Students will register for the PRAXIS School Psychologist (5402) Examination and have the results sent to the Program Director to complete the first part of the examination. Students should go to the Website for the examination and study all the details concerning its administration at: <http://www.ets.org>.

II. **Case-Study Comprehensive Examination.** Students will independently complete the case study portion of the examination. Each student will complete a competency report in each of the following areas:

1. Assessment
2. Intervention
3. Consultation

- ***Students are not permitted to receive feedback from faculty or use any of the three cases that will be submitted for the examination for any course assignment. Failure to comply with this requirement will result in failure of the comprehensive examination.***
- ***Students will e-mail the three completed case study reports along with a signed Masters Comprehensive Examination Attestation Letter to the Program Administrative Assistant (on the date indicated each year).***
- Each competency case study report should be no more than ten double –spaced pages using 10-12 point font size. They must have 1-inch margins on all sides; and must be in either Times New Roman or Ariel font.
- The student's name must appear ***only on the cover page***. All pages must be numbered and have the title of competency area on each page, and the cover page should include only the title of the competency area (i.e., Assessment, Intervention, or Consultation) and the student's name.
- The cover page, references, and appendices do not count towards the total 10 pages.
- No material or wording should be used that could identify the student author of the examination except the appearance of the student's name on the cover page as mentioned above.
- The Assessment case study requires an appendix of the actual report on which the case was based. Charts and graphs are the only material that will be accepted as appendices for all three sections, and appendices do not count towards the final page

count. Please make sure that all identifying information, including district information is removed from appendixes.

4. Grading the Comprehensive Examination

The Program Director will select faculty members to score sections of the exam based on their possessing expertise in the respective area as well as familiarity with the training experiences that the students have received.

The Program administrative assistant will code each case study so that faculty are not aware of whose case is being evaluated. The exam will be scored using the School Psychology Department's Comprehensive Examination Scoring Rubric (see Appendix I). Each faculty examiner will report the results of the examination to the Program Administrative Assistant who will communicate the examination results to the Program Director. The Program Director will then input either a Pass or Fail grade to each student's PSY 105 course. If a student fails any part of the Comps (e.g., just 1 section, or if the PRAXIS result have not been received), he/she will receive a Failing grade until it is re-taken and passed.

Faculty members will grade the exam based on the enclosed rubrics, each of which requires 80% correct to pass. Any section that receives a failing grade (less than 80) will then be re-graded by a second, different faculty member. If the two faculty members grading an exam disagree, a third reader will be sought.

5. Instructions for the Comprehensive Examination

*See enclosed documents for further instructions.

Assessment Section

Please see Appendix J and K.

Consultation Section

Select an actual consultation case that you have worked on during your internship experience. The case can be any type of consultation including, but not limited to: behavioral, instructional, parent, mental health, system-wide, or consultation to determine program development, continuation, or evaluation. In your writing, you are encouraged to be consistent with how you were trained in the program. That is, as school psychology is a science, you must use data to guide your decision-making process. Data must be used to identify and analyze the problem, and to develop an intervention plan and evaluate its effectiveness. All data and the methods used for data collection should be incorporated into the conceptualization of this case, and if applicable attached as appendixes (charts and graphs only). Describe and discuss each of the following issues in your paper:

1. Who made the referral for the consultation and what question or concern did they want addressed through the consultation?
2. What information did you collect before starting the consultation? Describe what you assessed and how you assessed it. How did you make use of this data to guide the consultation process?

3. What did you do to establish rapport with the consultee and to ensure that the consultative relationship was collaborative? How often did you meet with the consultee and how did you determine how often to meet?
4. Describe how you identified and analyzed the problem and explain the procedures that you used.
5. Describe the plan development. Was the plan developed collaboratively?
6. Describe the plan/intervention in detail. How did you determine what intervention to use to address the “problem”? Please include relevant references that you used to select the appropriate intervention for this case (empirical support). Was there training required to implement the plan, who had to be trained? Did materials have to be purchased? Were any staff members re-assigned to help implement the plan? In the event that you did not make the decisions because someone else did, describe their rationale and whether you agreed with their decision. If you disagreed with their decision, describe what you would have done differently.
7. Describe in detail how the intervention’s effectiveness was evaluated. Briefly describe the effectiveness of the plan. Include data to support your conclusions.
8. What the intervention plan implemented with integrity? How did you assess this?
9. Did the consultee feel that the intervention plan was acceptable? How did you assess this? If not, what could have been done differently to make it more acceptable?
10. Discuss any special issues that you perceive may have played a role in the process and outcome of collaboration. This may include, but is not limited to, working with individuals of diverse characteristics, system-wide strengths or barriers to consultation, school policy or legal mandates, family involvement in the child’s education, or your knowledge and training in the area in which consultation was sought.
11. Please report if you made use of any information technology methodologies relevant to this case. That is, did you access, evaluate, and utilize information sources and technology in ways that safeguard or enhance the quality of services.
12. Report the outcome of the consultation. That is, both qualitatively, did it appear to be successful as a consequence of the consultation and quantitatively, do that data support or refute the success of the intervention?
13. What did you learn from this experience? How can you modify what was done do that consultation can be more effective in the future?

Psychological Intervention Section

Select an actual psychological intervention that you have handled during your third-year field placement. It can be any type of intervention including, but not limited to, any of the following: individual counseling/therapy, group counseling or therapy, parent counseling/therapy, a mental health program, or a prevention program. Students are required to identify clear goals that can lead to outcomes assessment measures that will be collected throughout the course of the psychological interventions. Students must address how they use this data to evaluate the course of treatment and how they decide to continue with or redesign the interventions based on the progress.

Describe and discuss each of the following issues in your paper.

1. Who made the referral for the psychological intervention and what problem or problems did the referring agent want addressed by the intervention? For an intervention or prevention program, who made the request for the program and what did they wish the program to accomplish?
2. What information did you collect before starting the intervention? Describe what you assessed, who provided the information, and how you assessed it. Describe how you used this information from the assessment to assist you in making decisions about service delivery.
3. How did you determine which psychological interventions to use? What variables did you consider in making your clinical decision? If you did not decide which interventions or information to use because someone else made that decision (a supervisor or other team member), describe their rationale and whether you agreed with their decision or what you would have done differently if you disagreed. Describe the process of planning for goal setting along with the decision-making processes involved. Describe the methodologies put in place and provide references where appropriate that empirically support the decisions that were made.
4. Discuss whether you developed a good alliance with the involved parties and if not, why not. Discuss any special issues that you perceive may have played a role in the development of the alliance.
5. How often did you meet with the client, and how did you determine how many times to meet?
6. Please report if you made use of any information technology methodologies relevant to this case. That is, did you access, evaluate, and utilize information sources and technology in ways that safeguard or enhance the quality of services.
7. Describe the outcome of the intervention and how you assessed the outcome. Discuss any special issues that you perceive may have played a role in the outcome of the intervention. This may include, but is not limited to, working with individuals of diverse characteristics, system-wide strengths or barriers to intervention, school policy or legal mandates, teacher or family involvement in the intervention, or your knowledge and training in the area in which the intervention was developed for.

6. Failure of the Comprehensive Exam

If you are notified that you have failed a portion of the Comprehensive Examination, please follow these steps:

- a. Contact program administrative assistant and request the faculty members' evaluations of the case study portion(s) of the exam that you failed.
- b. Contact the faculty members who failed you and obtain specific and targeted feedback regarding why your case study received a failing grade. Usually the rubric and notes on the Comprehensive Examination reflect this sufficiently.
- c. Consider strategies to remediate your skill weaknesses and meet with the faculty evaluative team to discuss your plan. The plan may include, for example, a list of specific readings, auditing a course that was already taken, receiving supervision on a similar type of case at our Center for Psychological Services, and the like.
- d. Communicate with the program director as to the date on which you plan to submit your second case study and submit your remediation plan to the Program Director for final approval.

- e. Communicate with the program director whether you will be able to get a case from your current field placement or whether you need assistance in getting a case.
- f. When you submit your second case study in the area(s) in which you received a failing grade, your case study will be reviewed by members of the faculty who were not involved in the scoring of your first exam.

Please recall that you are only given two opportunities to successfully pass this exam. It is strongly recommended that you not rush through this process and make every effort to address all your areas of deficiency.

M. Graduation

Graduate degrees are conferred by the Board of Trustees three times a year on the Queens Campus in January, May, and September. There are no graduation ceremonies in January or September. Students are encouraged to check the University Bulletin to be aware of dates and deadlines for graduation ceremonies.

During their final semester in the program, students will receive a notification via e-mail from the Registrar's office to apply for their diploma via the UIS system.

N. Certification

1. School Psychology Certification

The New York State Education Department's Office of Teacher Certification has registered and approved our School Psychology programs. Students who successfully complete the program are entitled to apply for certification in School Psychology.

Instructions for how to apply for certification online can be found on the Psy.D. webpage under the "Information for Current Students" section.

PROVISIONAL CERTIFICATION:

1. Students need to apply for certification through the TEACH website:
 - a. Approved Training Program Pathway
 - b. Code for our Programs: 80299
2. Students are responsible for making sure that documentation of the required workshops are sent to the State for:
 - a. Violence Prevention
 - b. Mandated Reporter
 - c. DASA
3. Once your degree is conferred, the Program in coordination with the School of Education will submit the Institutional Recommendation on your behalf.

PERMANENT CERTIFICATION:

This step is done independently and does not require the Program or University's assistance.

1. Apply via TEACH website:
 - a. Approved Training Program Pathway
 - b. Code for our Programs: 80299

2. Foreign Students

Foreign students cannot apply for certification as a school psychologist in New York State (and many other states) unless (1) the student has a Green card at the time she or he applies for the provisional certification, and (2) he or she has become a citizen by the time he or she applies for permanent certification (a maximum of five years after having the provisional certification). No citizenship requirements exist for the psychology license in New York State.

3. Certification and Licensure in other States

The School Psychology Programs at St. John's University are aligned with credentialing requirements set by New York State for the certification of School Psychologists and licensure of Psychologists, and the National Association of School Psychologists' Nationally Certified School Psychologist (NCSP) credential. Students are solely responsible to be aware of any other requirements that are necessary to be credentialed elsewhere.

4. Required Workshops

Three workshops are required by New York State for certification as a School Psychologist. These workshops are: Child Abuse & Maltreatment Identification, Reporting, & Intervention for Mandated Professionals, School Violence: Prevention and Intervention Strategies, and the Dignity for All Students Act (DASA). Workshops are free for students and are offered at varying times throughout the year. Students are responsible for providing copies of certificates of completion for these seminars to the department, and also retain copies for the NYS licensing board.

O. Professional Organizations

1. National Association of School Psychologists (NASP)

The National Association of School Psychologists (NASP) was founded in 1969. It is a non-profit organization and the world's largest association of school psychologists. NASP represents over 20,000 school psychologists and related professionals who are dedicated to serving the education and mental health needs of children, adolescents, young adults, and families.

NASP holds two main objectives:

1. Promoting the rights, welfare, education, and mental health of children and youth.
2. Advancing the profession of school psychology.

NASP accomplishes these objectives through education, service, research, and policy development. NASP has aided in setting professional and ethical standards, and provides a nationally recognized certification system. The NASP standards that most directly guide this program's practice can be found in Appendix M. Policy makers and government officials at the state and national level highly value NASP's views.

Members will receive publications of the Communiqué eight times per year. This is a newspaper covering the latest in events, innovative practices, legislative developments, parent/teacher handouts, book and test reviews, employment notices, and more. Members will also receive the quarterly School Psychologist Review, the world's second largest psychology journal. Discounts and additional benefits are available for NASP convention and meeting registrations, books, and certification fees. Please note that one must renew membership annually and a special student-discounted rate is available.

2. American Psychological Association (APA)

The American Psychological Association is the national organization for psychologists. APA is a doctoral level organization. To become a member one must possess a Ph.D., Psy.D., or Ed.D., however, student memberships are available and are encouraged. APA is divided into approximately fifty-four divisions that represent the different areas within the field of psychology. Division Sixteen is the school psychology division. Each division has its own governing body that monitors and guides their particular division. Each division has equal representation within the overall governing body of APA. APA also has a student organization that is not area specific. Students within clinical or school psychology are encouraged to join APA and become active members in the student organization.

3. Student Affiliates of School Psychologists (SASP)

The Student Affiliates of School Psychology (SASP) is a student run organization, which is comprised of graduate students from all levels of the School Psychology program at St. John's University. SASP serves as a general representative body for current graduate students and is a forum where issues related to training and practice in School Psychology can be discussed. Our aim is to keep members apprised of current issues pertaining to school psychology, as well as to foster participation in activities that will further strengthen this discipline in the future, as well as those that benefit the community at large.

The goals of SASP are threefold: 1) To provide an integrated communication and support network for graduate students concerning professional/ethical issues, academic issues, internship/employment opportunities, and shared needs/concerns across a variety of topics; 2) To foster participation in SASP sponsored workshops and lectures as well as attendance at professional conferences and colloquia; and 3) To interact with undergraduate psychology students in order to provide them with information regarding graduate studies and the field of school psychology.

Membership is open to all School Psychology students, and participation is encouraged. In addition to regular membership, SASP has several formal officer positions, including President, Vice President, Secretary, Academic Events Chair, Community Service Chair and Social Activities Chair. Students are elected to these positions annually by current graduate students in the program, and are in charge of their own subcommittees related to their respective roles. Officers generally serve a one-year term, lasting from September to May.

4. New York Associations of School Psychologists (NYASP)

The New York Association of School Psychologists is an affiliate of the National Association of School Psychologists. It is the professional organization representing school psychologists in

New York State. NYASP was initially formed in 1971 and in 1982 merged with the School Psychologists of Upstate New York (SPUNY). NYASP membership has approximately 1,000 school psychologists. The voting members of the NYASP Board consists of elected Chapter Representatives and the executive committee. The President appoints alternates for each chapter.

NYASP has four main objectives:

1. To attend to the mental health needs of all youngsters;
2. To promote the welfare of all children;
3. To promote and further the interests and standards of school psychology; and
4. To inform the public about the services provided by school psychologists.

Recently, NYASP developed a five-year strategic plan dealing with the impact of legislation and regulation on school psychologists. The plan attempts to reinforce and re-define the role of school psychologists so that they are no longer viewed as only psychometricians. Rather, NYASP promotes awareness that school psychologists have received training in consultation, intervention, and prevention services for students and families. The plan also addresses educational reform, including such issues as the over-representation of minorities in special education.

The organization also attempts to increase the knowledge base of school psychologists and provide opportunities for professional growth. NYASP does this by offering annual conferences and a Summer Institute, which is part of their continuing education package. NYASP also has a strong lobbying voice in legislation and has secured a law firm for such purposes.

Members will receive special publications about issues faced by school psychologists and other privileges and discounted services. Please note that membership must be renewed annually and a special student rate is available.

5. New York State Psychological Association (NYSPA)

One potential organization that full-time graduate students may join to further their involvement while in the School Psychology program and upon graduating, is the New York State Psychological Association (NYSPA) - an affiliate of the American Psychological Association (APA). This organization was formed in 1947 and currently has almost 3,000 members. A Council of Representatives directs NYSPA, which consists of elected officers, specialty division representatives, and affiliated regional psychological association representatives.

NYSPA has three main objectives:

1. To protect the interests of the profession and the public;
2. To develop the profession and science of psychology and promote human welfare; and
3. To institute and uphold standards of competency, training, service, and ethics.

These goals are achieved through various means, such as: outreach and educational projects to inform the public; an annual convention and division workshops for psychologists; providing ethical and legal advice for psychologists; and continuing education courses. NYSPA also has a

strong lobbying voice in State and Federal Legislatures which played a fundamental role in third-party payment assistance (Medicaid, Medicare, and Workers' Compensation) for psychologists.

By joining, students will receive current information on critical psychological issues through the NYSPA Notebook bimonthly publication, New York State "Psychologist" magazine, and Task Force reports. Members also receive other privileges and discounted services. Please note that membership must be renewed annually and a special student rate is available.

Appendix A

The School Psychology Department of St. John's University
Statement on Plagiarism and Learning Exercises

Recommended Procedure for Handling Plagiarism Cases

PLAGIARISM STATEMENT

Dr. Miguel Roig

Scholarly endeavors often rely on the ideas and findings of others. For example, the body of knowledge represented in most of the textbooks used in your classes is based on a summary and synthesis of the work of many researchers. You will notice that their contribution is acknowledged in the reference section at the end of each textbook. In a similar fashion, when you write a paper for a course, you must credit the sources you use by using acceptable documentation procedures. In our discipline we almost always use the style suggested by the American Psychological Association (APA; see Publication Manual of the American Psychological Association, 2001). Failing to acknowledge the contributions of others in one's work constitutes a serious type of academic dishonesty that is known as plagiarism.

Plagiarism occurs when a student leads the professor or others to believe that work submitted for a course (a term paper, an oral presentation, a homework assignment) is his/her own original work, when in fact portions of the project (even small portions), or the entire project, was produced by someone else. Most often plagiarism occurs in assigned papers when the student either fails to acknowledge the source of his/her ideas or text or fails to properly paraphrase and/or summarize others' work even when such works are acknowledged in the paper's reference section. For guidelines for proper paraphrasing see the examples below.

Another common type of plagiarism, known as self-plagiarism, occurs when students take part of a paper, or an entire paper, that had been written for a previously taken course and submit it in a new course. Under rare circumstances this type of activity may be acceptable, if the instructors from both courses involved are aware of the extent of this type of borrowing and provide the student with written permission.

Keep in mind that there are many other forms of plagiarism. What follows are some of the most common types of plagiarism and other dishonest writing practices.

Including portions of text from a source, regardless of whether it is published, unpublished, or whether it is obtained from the Internet, without either putting such text in quotation marks or not sufficiently paraphrasing the text (see below for some guidelines):

Using a paper, or portions of a paper, that has been bought, downloaded from the Internet, or written by someone else.

Taking sentences and/or paragraphs from various published, unpublished, or Internet sources and stringing them together resulting in a coherent essay, but not representing the student's own writing.

Making up sources that either do not exist or were not consulted for the paper.

In a reference section (as opposed to a bibliography), listing works that were cited by one of the sources that was consulted for the paper but which the student did not read.

Using a paper or portions of a paper written for a previous course and submitting for another course.

ACCEPTABLE FORMS OF HELP WHEN WRITING PAPERS

If you have difficulties writing a paper for a course, you may wish to seek the services of the Writing Center. Generally, it is acceptable to have another student examine your work, point out grammatical deficiencies in your writing and make suggestions for improving your paper. In fact, this type of collaboration is usually encouraged in most classes. However, such help should be acknowledged in a footnote in your paper. Remember that, ultimately, the words used in your paper must be your own.

Obviously, you may seek clarification from the instructor on matters regarding the writing of your paper. However, asking a professor to review your paper before submitting it for a grade is inappropriate if such an offer has not been extended to the other students in the class. For theses and dissertations, your primary mentor will work more closely with you and he/she may have a more active role in the writing process.

LEARNING EXERCISES

Avoiding plagiarism by correctly paraphrasing text

Imagine that you are in the process of writing a paper. In researching material for the topic you are writing about, you locate the following relevant paragraph in a published source:

"If you have ever had your astrological chart done, you may have been impressed with its seeming accuracy. Careful reading shows many such charts to be made up of mostly flattering traits. Naturally, when your personality is described in desirable terms, it is hard to deny that the description has the 'ring of truth'" (Coon, B. (1995) Introduction to Psychology: exploration and application (7th Ed.). New York: West., p. 29.

It would be legitimate to include this portion of text in your paper by enclosing it in quotations and adding the Coon citation at the end of the paragraph just as it appears above, or in the form of a footnote, depending on the style of writing you use (e.g., MLA, APA). However, the use of direct quotes should be kept to a very minimum, perhaps one or two short quotes in a paper.

Let's assume that you want to include the information from the above paragraph in your paper but that you do not want to use a direct quote as shown above. Instead, you are considering the rewritten versions shown below. How different does the rewritten, paraphrased version have to be so as to not be classified as a case of plagiarism?

Please examine each rewritten paragraph carefully, compare it with the original version above, and circle the appropriate abbreviation to indicate whether, in your opinion, the rewritten version constitutes a case of plagiarism (P), not plagiarism (NP), that is, the paragraph has been appropriately paraphrased, or you simply cannot determine (CD) whether the rewritten version has been plagiarized or not. Please indicate the reasons for your decision in the space provided. Also, in making your decision, assume that a correct citation (e.g., a footnote; Coon, 1995) appears in the rewritten version and in the paper's reference section or bibliography in accordance with the specific writing style used in the discipline for which the paper is being written.

1. Naturally, when your personality is described in desirable terms, it is hard
P to deny that the description has the 'ring of truth'. If you have ever had your
NP astrological chart done, you may have been impressed with its seeming accuracy.
CD Careful reading shows many such charts to be made up of mostly flattering
traits.

2. If you ever had your astrological chart done, you may have been
P impressed by how accurate it seemed. A careful reading indicates many
NP such charts to be made up of mainly flattering traits. Of course, when
CD your personality is described in desirable terms, it is hard to deny that the
description has the 'ring of truth'.

3. If you have ever had your astrological chart done, you were probably
P impressed by how accurate it seemed. A careful reading indicates many
NP such charts to be made up of mainly flattering traits. Of course, it is hard to
CD deny that the description has the 'ring of truth', when your personality is
described in desirable terms.

4. According to Coon, if you ever have had your astrological chart done,
P you were probably impressed by how accurate it seemed. A careful reading
NP indicates many such charts to be made up of mainly flattering traits. Of course,
CD it is hard to deny that the description has the 'ring of truth' when your
personality is described in desirable terms.

5. According to Coon, individuals who have had their astrological chart
P profiled may have been swayed by their apparent precision. If you study these
NP charts, however, you realize that they are primarily composed of complimentary
CD attributes. Obviously, as Coon notes, when one is described with positive,
laudable traits, it is difficult to argue against such a flattering portrait of oneself.

6. Individuals who have had their astrological chart profiled may have been
P swayed by their apparent precision. If you study these charts, however, you
NP realize that they are primarily composed of complimentary attributes.
CD Obviously, when one is described with positive, laudable traits, it is difficult to
argue against such flattering portrait of oneself.

Now, let's see how your answers compare to ours. Remember that we have assumed that acknowledgement has been made in either the reference section (works cited).

Paragraphs 1 and 2 are clearly plagiarized. In paragraph 1, the only modification made to the original text was changing the order of the sentences. In paragraph 2 the original order of the sentences was preserved and only a couple of words were changed. Paragraph 3 is similarly plagiarized. Although the third sentence was modestly changed, the modifications are not sufficiently substantial to be considered an appropriate paraphrase. Remember, just because you have acknowledged the original author in the bibliography or reference section, or even in the body of your paper (paragraph 4), you still need to use your own words in expressing someone else's ideas or observations. Thus paragraph 4 is also plagiarized because it still reads too close to the original.

Paragraphs 5 and 6 have been sufficiently modified to constitute correct paraphrases. Some might argue, however, that these paraphrases follow too closely the structure of the original paragraph (i.e., the order of the sentences). Therefore, ideally one should not only change the words of the original source, but also the structure.

Remember, if you still have questions about what constitutes plagiarism consult your professors.

Publication Manual of the American Psychological Association 5th Edition (2001). Washington, D.C. American Psychological Association.

On March 28, 2006, the Liberal Arts Faculty Council passed the following recommended procedure for handling plagiarism cases:

RECOMMENDED PROCEDURE FOR HANDLING PLAGIARISM CASES

I First Instance of Plagiarism

1. Student given an F for the assignment.
2. Note sent to student's Dean with copy of plagiarized assignment and proof.
3. Student required to take the MITT (Multimedia Integrity Teaching Tool).
4. Student not permitted to complete another assignment until MITT is completed.

II Second Instance (in same course)

1. Student given an F for the course
2. Note sent to student's Dean with copy of plagiarized assignment and proof. Dean is notified that this is second instance of plagiarism in same course and that student received an F for the course.

The Multimedia Integrity Teaching Tool: An Interactive, Educational Program to Promote Academic Integrity

The MITT (Multimedia Integrity Teaching Tool) is a computerized integrity seminar on CD-ROM consisting of interactive lessons designed to "catch" cheating before it becomes a habit. Decision-making, case examples, and abstract concepts come alive with video, graphics, music and animation.

Every lesson and feature of the MITT program was extensively evaluated for effectiveness, impact of content and format, comprehensibility, and ease of use. Content is adapted from the academic dishonesty research base and relevant social science literature

Appendix B

Community Service

SCHOOL PSYCHOLOGY PROGRAM

COMMUNITY SERVICE PROGRAM CONTRACT

Student's Name:

The purpose of the community service program is to provide St. John's University Graduate Students in School Psychology an opportunity to connect with the local community and provide needed volunteer service to disadvantaged communities that uses the students' strengths, academic knowledge and skills.

Students enrolled in one of the graduate programs in School Psychology will complete 30 community service hours in their first year of attendance.

Community service activities may be, but are not required to be, related to the field of school psychology. Students may not use a current position through which they are employed for community service hours. The student must submit a completed copy of this form to the Program's Administrative Assistant by the specified date. Please save a completed copy of these forms for your records.

I hereby declare that I will participate in the required community service initiative. By signing below, I am confirming that I will be working with agencies/organizations as a part of my commitment in working towards completing at least 30 hours of community service.

Student's Signature and Date:

**SCHOOL PSYCHOLOGY PROGRAM
COMMUNITY SERVICE PROGRAM LOG**

Student Name:

Dear Supervisor,

Thank you for your participation in our community service initiative. By signing below, you are confirming that the student named above has worked with your agency/organization as a part of the student's commitment in working towards completing at least 30 hours of community service.

Supervisor's Signature and date:

The student must submit a completed copy of this form to the Program's Administrative Assistant by the specified date.

COMMUNITY SERVICE AGENCY/ORGANIZATION:

Appendix C

Third Year Field Placement Contract

School Psychology MS Program Internship Contract
Department of Psychology

This certifies that (supervisor) _____, will serve as a school psychology supervisor for (student) _____, who is presently a student in good standing in the MS program in School Psychology at St. John's University. The internship will take place at the (name of school) _____ in the (name of school district) _____.

The student agrees to be at the internship site for **5 full** working days for the entire school district academic year, (from _____ to _____) for a total of **1200 hours**. The student understands that no financial compensation will be awarded for the internship hours. The student agrees that he or she has read the list of competencies that interns are expected to achieve. The student agrees to cooperate fully with his or her supervisor and keep him or her fully apprised of his or her professional internship activities.

The supervisor agrees to meet with the intern for a minimum of 2 hours of direct, face to face supervision each week. The supervision must occur on site as the supervisor will have greater familiarity with working in an organized setting such as a school, will know the population, the setting and its policies, and most of all, have access to client records as they cannot be removed from the setting. The supervisor agrees to inform the student of his or her evaluation of the student's work and to provide corrective feedback to him or her. The supervisor attests to the fact that they are supervising no more than 2 interns during the internship period specified above and that they are afforded an adequate amount of release time to meet the requirements and responsibilities of in/externship supervision. The supervisor will follow the training objectives agreed upon in the planning form.

The supervisor attests to the fact that: the student will be able to participate in continuing professional development activities when available, the student will be able to participate in meetings attended by field psychologists employed in the district, the student will receive adequate supplies, materials, office space, and administrative/secretarial services consistent with those afforded to regular staff members, and the student will be reimbursed, in accordance with the policies of the field site, for any travel expenses they may incur.

The supervisor and intern attest to the fact that they are aware of their roles and are committed to fulfilling their respective responsibilities.

Third Year Placement Planning Form

GRADUATE SCHOOL OF ARTS AND SCIENCES

School Psychology Internship Objectives

Planning Form

Student: _____ Beginning Date: _____
Placement: _____ Ending Date: _____
Field Supervisor: _____ Supervision Hours: _____
University Supervisor: _____ Date of Planning Session: _____

Listed below are 17 Objectives for students to reach during their School Psychology Externship. Below each objective is a list of activities which could fulfill the objective.

The objectives and activities for reaching the objectives will serve as a basis for planning a unique externship experience for each student. Obviously the experience provided at sites will differ and field supervisors will have different suggestions for reaching some of these objectives. We do not expect each site to provide every activity. Decisions concerning the plan should be made at the beginning of the externship experience. The plan may also be modified as the year progresses, however, all parties involved must discuss and approve these modifications.

1. The student will become familiar with the roles of practicing school psychologists.

___ Allow student to accompany the school psychologist during a typical day.

___ Allow student to become familiar with other psychologists and their duties in the building/district.

___ Ask student to discuss issues of professional ethics and standards that relate to his or her or the supervisor's contacts with clients.

2. The student will be introduced to the organizational functioning, administration, implementation of policies, and politics of school settings and school districts.

___ Introduce student to various members of the staff and school community.

___ Allow student to attend building staff meetings and pupil personnel committee meetings and/or Educational Planning Committee meetings.

___ Ask student to inspect and report on student records and record keeping systems in the school.

___ Ask student to read and report on district policies including policies for providing psychological services.

___ Allow student to interview various professionals.

___ Allow student to attend a school board meeting.

___ Allow student to attend a parents' organization meeting.

___ Allow student to attend a general faculty meeting.

3. The student will gain experience in the process of special education referral, evaluation, placement, and remediation, and developing treatment plans.

___ Allow student to attend and observe a committee on special education.

___ Allow student to observe and spend time in special education classrooms (e.g., self-continued, resource room, gifted).

___ Allow student to present the results of a case evaluation to a committee on special education.

___ Allow student to evaluate an Individual Education Plan for remediation for children with different handicapping conditions. *

___ Allow student to present their assessments and recommendations to the district Committee on Special Education and to become familiar with the process of the Committee's work and the legal and regulatory issues involved in the Committee's functioning. *

___ Allow student to conduct triennial evaluations, and annual reviews of special education children to evaluate their progress and make recommendations. *

4. The student will become knowledgeable about the process of regular education.

___ Allow student to observe and spend time in a kindergarten or preschool classroom.

___ Allow student to observe and spend time in an elementary level classroom.

___ Allow student to observe and spend time in a junior high level classroom.

___ Allow student to observe and spend time in a high school classroom.

5. The student will become acquainted with community resources that support school psychological services.

___ Allow student to observe liaison meetings between supervisor and other agencies.

___ Allow student to consult with personnel from the community (e.g., medical, mental health, child welfare).

___ Allow student to coordinate case services with another community agency.

___ Allow student to visit community agencies (e.g., child welfare agency, family service agency, residential treatment center, juvenile court).

6. The student will gain experience and develop competence in clinical diagnostic interviewing.

___ Allow student to observe the supervisor interviewing students, parents, teachers, and other staff members.

___ Allow student to conduct diagnostic clinical interviews with students, parents, teachers, and other staff members.

7. The student will gain experience and develop competence in providing consultation services.

___ Allow the student to engage in a consultation case with a parent, teacher, or other staff member (e.g., behavioral, academic, mental health, organizational).

___ Allow the student to work with the consultee in collecting data through a variety of means (e.g., interviews, observations, informal assessment, curriculum based assessment).

___ Ask the student to present the goals, intervention strategies, and rationale for at least one consultation case.

___ Allow the student to use the data collected to consult with parents or staff for the purpose of planning and implementing an intervention program.

___ Allow the student to systematically evaluate the consultation process by collecting process and outcome data.

___ Allow student to gain experience developing recommendations for pre-referral interventions.

8. The student will gain experience and develop competence in behavioral observation and assessment.

___ Allow student to collect behavioral data by interviewing a student, parent, teacher, or other staff.

___ Allow student to observe children's' classroom behavior, identify, and systematically record data on target behaviors.

___ Allow student to observe teachers instructional and classroom management behavior, record, and report on data.

___ Allow student to conduct an environmental assessment and report on data.

9. The student will gain experience and develop competence in assessment of emotional and social adjustment.

___ Allow student to conduct and report results from comprehensive assessment of emotional and social adjustment of children at several grade levels.

10. The student will gain experience and develop competence in intellectual assessment.

___ Allow student to observe supervisor conducting an assessment.

___ Observe student giving various intelligence tests.

___ Allow student to conduct and report results of comprehensive intellectual evaluation at the:

___ preschool or kindergarten level

___ elementary level

___ junior high level

___ high school level

___ Allow student to conduct and report results of at least one comprehensive intellectual evaluation of a minority student.

11. The student will gain experience and develop competence in academic assessment.

___ Allow student to observe various professionals (e.g., supervisor, education evaluator, teacher) conducting an assessment.

___ Observe student giving various academic tests.

___ Allow student to observe/participate in screening or readiness evaluations at the pre-school and kindergarten level.

___ Allow student to inspect and report on the curriculum materials being used with referred child as part of planning the assessment.

___ Allow student to conduct and report results of comprehensive language, mathematics, and reading assessments at the:

___ elementary level

___ junior high level

___ high school level

___ Allow student to conduct and report results of at least one comprehensive academic evaluation of a minority student.

___ Allow student to inspect and report on group tests given in the placement.

___ Allow student to attend meetings of committees established to examine curriculum.

12. The student will gain experience and develop competence in both regular and crisis intervention strategies.

___ Allow student to accompany the field supervisor during intervention activities.

___ Allow student to address referral issues raised during assessment or consultation activities

with a planned program for intervention.

- Allow student to implement a remediation plan.
- Ask student to participate in providing in-service programs for teachers.
- Ask student to provide goals, interventions, and rationale for a counseling case.
- Allow student to observe/participate in providing crisis intervention. *
- Allow student to observe/participate in the development of a crisis intervention plan.

13. The student will gain experience and become proficient in writing comprehensive psychoeducational reports.

- Ask student to write and submit case reports for assessment cases.
- Ask student to write and submit case reports for consultation and intervention cases.

14. The student will demonstrate accountability for activities as a practicing school psychologist.

- Ask student to keep a daily log of activities. **
- Allow student to collect and share effectiveness data from intervention activities.
- Allow student to collect and share effectiveness data from consultation activities.
- Assist student in systematically evaluating his or her effectiveness through providing fairly frequent feedback sessions.
- Allow student to participate in original research or evaluation studies in the school.

15. The student will evaluate his or her personal skills and abilities to assume an effective school psychology role.

- Ask student to review and analyze his or her impact on students, parents, and various professionals in the school.

16. Students will gain experience providing feedback on their assessment and recommendations to school children, parents, teachers, and other school personnel.

- Allow student to be present when supervisor gives feedback to school children, parents, teachers, and/or other school personnel.
- Allow student to give feedback, under supervision, to school children, parents, teachers, and/or other school personnel.
- Allow student to give feedback independent of direct supervision teachers, and/or School Personnel.

17. Students will gain experience in counseling school children individually and in groups.

- Allow student to counsel children individually.
- Allow student to counsel children in groups.
- Ask student to participate in providing group counseling or group discussion services for students and parents.

Other activities or objectives:

•Any item followed by an * denotes a required activity. The externship site does not have to provide this activity during the 1st half of the externship, but the student must complete this activity sometime within the externship period.

** The time log is a required activity for the entire externship period.

Appendix H

A Philosophy of Best Practices in Conducting Psychoeducational Assessments

A Philosophy of Best Practices in Conducting Psychoeducational Assessments

1. The fundamental question. All efforts and activities conducted in regard to the process of assessment, including pre-referral activities, should seek to answer the fundamental question, “why is the student unable to learn normally within the context of the regular classroom?”
2. Hypothesis driven assessment. Assessment is driven by a priori and a posteriori hypotheses. The fundamental a priori hypothesis is that the cause of the individual’s learning difficulties is due to factors external to the individual. That is, assessment is conducted with the notion that there is nothing wrong with the individual and that systemic, ecological, or environmental factors are the primary reason for the observed learning problems. This hypothesis is retained when all plausible external factors have been ruled out as the primary cause of the observed difficulties. This hypothesis is rejected when the collected data suggest that the observed difficulties are the result of intrinsic dysfunction (e.g., cognitive processing deficits).
3. Focused assessment. Assessments should be focused on gathering data to answer specific questions and to test a priori hypotheses. Assessment should not be exploratory in nature and needlessly broad or vague. Assessment should not be conducted in a manner that seeks to uncover whatever dysfunction might arise by chance. Assessment is a hunting trip that targets specific game, not a fishing trip that casts a wide net to see what might be pulled in. In addition, procedures such as observation and interview should be as focused as all other activities with respect to the gathering of information that is relevant to answering specific questions, testing a priori hypotheses, and addressing well defined referral concerns.
4. No “standard battery.” Assessments should be designed to meet the particular circumstances of the referral and idiosyncrasies of the individual. The use of a “standard battery” in assessment is antithetical to this notion, represents an unacceptable method of practice, and violates the legal mandates which specify that assessments must be appropriate and individualized.
5. No routine testing. Testing may or may not be a part of assessment. The use of standardized tests is not always a necessary component of every assessment and should not be used on a routine basis. When standardized tests are deemed necessary, a battery should be organized and individualized to answer specific, referral-relevant questions and test a priori hypotheses. The administration of unnecessary tests or those that are superfluous to the referral is invasive and should be avoided.
6. Systematic assessment. Assessment should be systematic, logical, and guided by an established framework that is specifically designed to focus on the areas of functioning that are relevant to the referral. Where necessary or relevant, assessment activities should be conducted in a manner that reduces potential bias or discrimination to the maximum extent possible.
7. Consider all data as important. Data gathered from activities other than testing, such as from observations, interviews, record reviews, authentic assessment, work samples, and so forth, are to be accorded equal weight in the determination of the causes of an individual’s presumed or observed learning difficulties.

8. Multiple, corroborating data sources. Decisions regarding the feasibility of and given factor or factors as the primary cause of the individual's reported difficulties must not be based on only one procedure or data source. Diagnostic decisions should always be based on corroborating evidence from multiple sources and types of data.

9. Link assessment to intervention. Psychoeducational assessment reports should reflect the process outlined above and must answer the fundamental question regarding the cause of the individual's reported or observed learning difficulties. The report reflects the professional opinion of the assessor and should include a clear description and summary of the findings, a diagnosis (if applicable), and specific recommendations for intervention.

10. Limits of competency. Students should not engage in any assessment activities for which they have no training or competency, unless such activities are conducted under the close supervision and guidance of a practitioner who possesses the necessary knowledge and expertise to guide the student and the assessment.

Appendix I

Comprehensive Examination Scoring Rubric

This rubric was adapted from the NCSP Case Study to provide feedback on specific areas of your assessment case write-up. School psychologists are expected to have knowledge of assessment-related issues including operationalizing referral concerns, selecting assessment instruments, designing interventions, offering recommendations, and collaborating effectively with others in planning and decision-making processes at the individual, group, and system levels. This sheet will be completed by the evaluator. Students must receive a minimum of 80 points out of the possible 100 points to receive a passing evaluation.

[Reset All Ratings](#)

Section 1: Reason and Purpose of Evaluation		4 = Good	3 = Fair	2 = Poor	1 = Fail
1	The reason and purpose of the evaluation are clearly defined.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
2	The evaluation is operationalized via collaborative efforts comprising pre-referral data, current information, or existing records (e.g., reading referral is based on teacher interview as a reading decoding issue; team review of current IEP goals and objectives).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
3	Existing data and information are examined with respect to a wide range of possible considerations relevant to social, emotional, environmental, familial, cultural, linguistic, and school factors.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
4	Examination and review of pre-referral data, current information, or existing records is used to assess the need and extent of the evaluation and to guide further efforts in assessment.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Section 1 total score = 16/16			
Section 2: Assessment Planning		4 = Good	3 = Fair	2 = Poor	1 = Fail
5	Hypotheses regarding the direction of the evaluation were generated through collaboration with teachers and parents and the extant literature.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
6	Multiple sources of data collection methods were considered (e.g., standardized measures, interviews, work samples, progress monitoring data, behavioral observations, etc.) that would allow the evaluator to examine each proposed hypothesis.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
7	Hypotheses reflect an awareness of the complexity of learning and behavioral, and emotional issues (e.g., physical, social, emotional, environmental, cultural, linguistic, and cognitive factors).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Section 2 total score = 12/12			
Section 3: Evaluation/Interpretation		4 = Good	3 = Fair	2 = Poor	1 = Fail
8	Instruments and procedures appropriate to the reason and purpose of the evaluation as well as examinee needs and characteristics (e.g., age, cultural/linguistic differences, rapport development, length of testing considerations, specific needs of examinee).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
9	Evaluation was based on a systematic approach (e.g., cross-battery assessment, nondiscriminatory assessment; curriculum-based assessment procedures; multi-method assessment, or integrates rating scales/measures of pathology, behavioral observations, and clinical interviews).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
10	Follow-up measures are administered where needed and/or additional data collection methods were utilized when necessary and appropriate.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
11	Interpretation of data moves from global to specific performance, evaluates stated hypotheses, and integrates possible non-cognitive factors on test performance.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
12	Evaluator identified conditions, situations or stimuli under which examinee's performance varies (e.g., task stimuli, behavioral differences across classes, teachers, home versus school differences).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
13	Areas assessed within the evaluation addressed the main elements regarding the reason and purpose of the evaluation and were guided by current theory and research.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Section 3 total score = 24/24

Section 4: Diagnostic Impressions/Conclusions 4 = Good 3 = Fair 2 = Poor 1 = Fail

14	An appropriate and defensible conceptual framework was applied in addressing the reason and purpose of the evaluation to generate the necessary and relevant data.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
15	The assessment data and information were integrated across domains in an appropriate and defensible manner to arrive at conclusions and inferences which correctly explain the available data including contradictory or anomalous findings.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
16	The diagnostic impression is consistent with a sound theoretical, legal, or other evidence-based framework and fully supported by the available data.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Section 4 total score = 12/12

Section 5: Intervention/Recommendations 4 = Good 3 = Fair 2 = Poor 1 = Fail

17	Intervention/recommendation selections are the result of systematic data-based decision making.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
18	Interventions/recommendations are empirically supported.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
19	Interventions/recommendations are appropriate to the needs of the student including attention to characteristics related to diversity (e.g., type of disability, linguistic differences).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Section 5 total score = 12/12

Section 6: Legal/Ethical Considerations 4 = Good 3 = Fair 2 = Poor 1 = Fail

20	Relevant aspects of the assessment complied with applicable ethical and professional standards.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
21	Relevant aspects of the assessment complied with applicable federal and state legal and statutory regulations.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
22	The assessment was consistent with best practices that reflect the philosophy of the program.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Section 6 total score = 12/12

Section 7: Evaluation of Written Component 4 = Good 3 = Fair 2 = Poor 1 = Fail

23	The writing is logical, well organized, and clear.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
24	The writing is grammatically correct, free of typographical/spelling errors, and readily comprehensible.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
25	The writing presents a persuasive and convincing opinion regarding the findings.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Section 7 total score = 12/12

EXAM TOTAL SCORE = 100/100

PASS **FAIL**

Comments:

This rubric was adapted from the NCSP Case Study to provide feedback on specific areas of your consultation case write-up. School psychologists are expected to have knowledge of behavioral, mental health, collaborative and other consultation models and methods of their application to particular situations along with the ability to collaborate effectively with others in planning and decision-making processes at the individual, group, and system levels. This sheet will be completed by the evaluator. Students must receive a minimum of 80 points out of the possible 100 points to receive a passing evaluation.

[Reset All Ratings](#)

Section 1: Problem Identification		3 = Good	2 = Fair	1 = Poor	0 = Fail
1	Baseline includes the student behavior and peer/grade norms.	●	○	○	○
2	The target behavior/problem is correctly identified, prioritized, operationally defined (observable, measurable, quantifiable).	●	○	○	○
3	The consultant and the consultee collaboratively develop a treatment goal: (s) including audience, behavior, degree/criterion, and context.	●	○	○	○
4	Treatment goal includes audience, behavior, degree/criterion and context	●	○	○	○
5	Parents/guardians and teachers are involved in the problem- identification process. If parents/guardians not involved, explain why.	●	○	○	○
Section 1 total score = 15/15					
Section 2: Problem Analysis		3 = Good	2 = Fair	1 = Poor	0 = Fail
6	Hypotheses are generated through collaboration with teacher and/or parent.	●	○	○	○
7	There are multiple sources of data (e.g., interviews, direct observation, questionnaires) from multiple individuals (e.g., teacher, parent, student) that converge on each proposed hypothesis. If they do not converge, explain why that might be.	●	○	○	○
8	All relevant information is used to generate hypotheses regarding the function of the student's behavior including:	●	○	○	○
9	- Antecedents	●	○	○	○
10	- Setting events	●	○	○	○
11	- Consequences	●	○	○	○
11	Hypotheses reflect an awareness of issues of diversity (e.g., physical, social, linguistic, cultural). <i>Note: This item applies to all consultees and clients, regardless of their race, religion, ethnicity, nationality, etc.</i>	●	○	○	○
Section 2 total score = 18/18					
Section 3: Intervention from Consultation		3 = Good	2 = Fair	1 = Poor	0 = Fail
12	Intervention(s) selection is based on data from problem analysis and hypothesis testing (intervention must be linked to assessment!)	●	○	○	○
13	Intervention(s) is evidence-based (e.g., research literature, functional analysis, single case design analysis) for the target problem and references are cited/presented	●	○	○	○
14	Intervention(s) are selected following the model for least intrusive interventions (i.e. Level 1) prior to moving to a more intrusive interventions through the hierarchy (i.e. Level 2, 3 and 4).	●	○	○	○
15	Intervention(s) is developed collaboratively with parent/teacher and implemented by the consultee (i.e., demonstrates that this is a consultation case versus an intervention case)	●	○	○	○
16	Intervention plan includes relevant:	●	○	○	○
17	- Antecedent-based strategies (prevention)	●	○	○	○
18	- Replacement skill instruction	●	○	○	○
19	- Consequence-based strategies (reinforcement)	●	○	○	○
20	Intervention(s) reflects sensitivity to individual differences, resources, classroom practices, and other system issues. For example, logistics of setting, time, resources, and personnel are included in the intervention plan.	●	○	○	○
21	Acceptability of intervention is verified	●	○	○	○
22	Intervention selection considers unintended outcomes or limitations	●	○	○	○

22	Treatment integrity checklist is used by the consultee for self-monitoring, and by the consultant during direct observation of plan implementation (e.g. observation occurs a minimum of 2 times).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
23	Following treatment integrity observations, consultant provides feedback to the consultee regarding implementation and recommendations for improvement.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Section 3 total score = 36/36

Section 4: Evaluation 3 = Good 2 = Fair 1 = Poor 0 = Fail

24	Single-case design was correctly specified (e.g., changing criterion, AB, multiple baseline, reversal, alternating treatment, etc.) and limitations with selected design are discussed	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
25	Graphing conventions are all included (e.g. axis labels, phase labels, black and white, etc.).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
26	Progress monitoring data are reviewed and analyzed for effectiveness compared to baseline. If success is limited, explain why this might be.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
27	Visual analysis of graphs (level, trend, immediacy, variability) is used to describe data and inform adjustments if deemed necessary.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
28	Calculation of effect size demonstrating impact of intervention on client. If effect size does not demonstrate an impact, explain why there may not have been an impact (e.g., discuss variables that may have impacted treatment outcome). Note: Must explain how effect size was calculated.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
29	Generalization strategies are incorporated in intervention plan (e.g. supporting behavior across different settings, people, times). Results of generalization are reported and graphed if time allows for implementation.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
30	Maintenance strategies (or modifications if necessary) are considered based upon collaborative examination of effectiveness data.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Section 4 total score = 21/21

Section 5: Legal/Ethical Considerations 3 = Good 2 = Fair 1 = Poor 0 = Fail

31	All aspects of the case intervention plan and implementation complied with applicable ethical and professional standards and legal guidelines. Communication as to which guidelines were complied with and how so should be indicated.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
----	--	----------------------------------	-----------------------	-----------------------	-----------------------

Section 5 total score = 3/3

Section 6: Evaluation of Written Component 3 = Good 2 = Fair 1 = Poor 0 = Fail

32	The written component of the examination was clear and demonstrated that the candidate is able to write in a manner reflective of the graduate degree. (e.g. grammatically correct, free of typographical errors, spelling, APA format, etc.).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
----	--	----------------------------------	-----------------------	-----------------------	-----------------------

Section 6 total score = 3/3

Section 7: Evaluation of Support Materials 4 = Good 3 = Fair 2 = Poor 1 = Fail

31	All aspects of the case intervention plan and implementation complied with applicable ethical and professional standards and legal guidelines. Communication as to which guidelines were complied with and how so should be indicated.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
----	--	----------------------------------	-----------------------	-----------------------	-----------------------

Section 5 total score = 4/4

EXAM TOTAL SCORE = 100/100 **PASS** **FAIL**

School psychologists are expected to have knowledge of behavioral, mental health, collaborative, and other consultation models and methods, their application to particular situation, and the ability to collaborate effectively with others in planning and decision-making processes at the individual, group, and system levels. This sheet will be completed by a faculty member. Students must receive a minimum of 80 points out of the possible 100 points to receive a passing evaluation.

[Reset All Ratings](#)

Section 1: Problem Identification		4 = Good	3 = Fair	2 = Poor	1 = Fail
1	The presenting problems were collaboratively identified using teacher(s), parent(s), and child reports. Explanation was provided if this criterion was not met.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
2	The problem was assessed using multiple methods of data collection (e.g., paper and pencil questionnaires, observation, interviews with multiple informants a functional behavior analysis, exploration of intervening cognitions. An explanation was provided if this criterion was not met).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
3	The target behaviors were operationally defined.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
4	The target behaviors were discussed in the context of appropriate developmental expectations (ex. norms, grade level expectations, age expectations).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
5	Baseline measures of the target problem behaviors were obtained (measures should reflect current evidence-based methodology).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Section 1 total score = 20/20			
Section 2: Case Conceptualization		4 = Good	3 = Fair	2 = Poor	1 = Fail
6	A case conceptualization was generated that integrated information collected from multiple informants and measures. Explanation was provided if this criterion was not met.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
7	The case conceptualization reflected an awareness of issues of diversity (e.g., physical, social, class, linguistic, religious, cultural).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
8	The case conceptualization was based on an evidence-based theory or empirical findings and logically followed from these positions.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
9	The case conceptualization included hypothetical mediating variables proposed by theories that were clearly separated from the outcome measures.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
10	The case conceptualization was re-formulated if the interventions failed to result obtain positive results.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Section 2 total score = 20/20			
Section 3: Intervention		4 = Good	3 = Fair	2 = Poor	1 = Fail
11	The intervention was clearly defined and followed from the case conceptualization and FBA.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
12	An agreement on the goals of therapy was accomplished to form a good therapeutic alliance.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
13	An explanation of the intervention was provided to the client and the client understood and consented to the intervention.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
14	Interventions reflected the best evidence-based practice. Explanation was provided for why the intervention was used if this criterion was not met.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
15	If multiple problems exist that required intervention, a rationale was provided concerning which order that the problems were treated.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
16	Interventions were modified, adapted, or terminated as was necessary by their unacceptability to stakeholders, ruptures in the alliance or ineffectiveness (if not applicable, score as effective).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
17	Plan for the continued course of therapy, termination, or follow-up is presented. Explanation was provided if this criterion was not met.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

18	Strategies for maintaining effect after termination (ex. attaining transfer/generalization of outcomes to other settings) were devised and their evidence based discussed (if the case is on-going, score as effective).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
----	--	----------------------------------	-----------------------	-----------------------	-----------------------

Section 3 total score = 32/32

Section 4: Evaluation		4 = Good	3 = Fair	2 = Poor	1 = Fail
------------------------------	--	-----------------	-----------------	-----------------	-----------------

19	Progress monitoring data were present and included measures of the target outcome behavior(s).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
20	Outcomes were charted included trend lines, and/or goal lines of the client's performance.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
21	Effect size(s) (R, R2 or d) were calculated demonstrating the impact of intervention on client.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
22	The progress monitoring and outcome data presented in effect sizes and graphic displays were discussed in text with respect to their meaning for the treatment outcome.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
23	If progress monitoring data indicated no or insufficient progress, a new case conceptualization hypothesis was developed and modified treatment was implemented (if not applicable, score as effective).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Section 4 total score = 20/20

Section 5: Legal/Ethical Considerations		4 = Good	3 = Fair	2 = Poor	1 = Fail
--	--	-----------------	-----------------	-----------------	-----------------

24	All aspects of the case intervention plan and implementation complied with applicable ethical and professional standards and legal guidelines.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Questions for the Assessment Comps Level III – Initial Evaluation

Questions for the Assessment Comps Level III – Initial Evaluation

An effective initial psychoeducational evaluation accomplishes four things: 1) it identifies and describes the significant elements in the student's learning environment that relate to the observed learning difficulties; 2) it assesses and describes the present status of the student's functioning in those areas suspected to be problematic; 3) it offers an opinion regarding the possible reasons for the student's observed learning difficulties (if any); and 4) it links assessment results with specific instructional strategies and appropriate educational interventions that guide, assist, and improve the educational decision making process and program development for the student. To accomplish these goals requires both technical and conceptual knowledge and skill. Technical competence is primarily evident in the report of evaluation that is part of the examination. Conceptual competence is primarily evident in the narrative portion of the examination. Ultimately, your responses to the questions below should demonstrate evidence of competency in these objective by describing the conceptualization that both guided as well as served as the framework for the completion of the technical aspects of the evaluation. This conceptual competency should be evident in your responses particularly when it is not discernable in your accompanying report.

The following questions should be answered in a manner that highlights the rationale and reasoning that resulted in the decisions that were made in the course of your evaluation. This includes satisfactory explanations for things that were conducted and those that were not. Any aspect of your evaluation, irrespective of whether it was or was not included or permitted in your final report (e.g., approach to evaluation, instrument selection, areas of suspected disability, diagnostic impressions, professional opinions, and intervention recommendations). Whether or not something was or was not included, allowed or not allowed, or permitted or not permitted in the course of your evaluation or preparation of your final report, if a question below asks about it, you must be prepared to answer. Responses to the effect, "my supervisor didn't allow me to..." or "I was not permitted to give..." or "I would have done XBA if..." will not be sufficient to earn a passing score. Whereas you were only partly responsible for the manner in which the evaluation might have been conducted, you are completely responsible for being able to demonstrate that you have the requisite knowledge to have conducted it on your own and in a manner consistent with your training in our program.

Rationale for the Assessment

1. What was the reason and purpose of this assessment?

(Explain why this particular assessment is being conducted as well as its intended purpose regarding the use of the collected information and the opinions you intend to offer. Note that reason and purpose are not the same thing and that each may be driven by different considerations related to practical, social, ethical, educational, theoretical, empirical, policy, and legal issues.)

2. Describe your conceptualization of and the plan for conducting this assessment so that it

effectively addressed the specific issues presented in the referral concerns?

(Explain your conceptualization of this case and how it guided the decisions made in response to considerations regarding the relevant practical, social, ethical, educational, theoretical, empirical, policy, and legal issues.)

3. Does this assessment provide a fair and valid picture of the student's situation and abilities? (Answer yes or no and then explain the reasons why you believe that the data and information you generated in the course of this assessment are valid and what, if anything, was necessary to make it so.)

Evaluation of Influences on Learning and Development

4. Were any experiential factors discovered that could account for the student's learning difficulties?

(Answer yes or no. If no, describe all relevant cultural, linguistic, economic, ecological, or systems factors that were considered but found not to be related to the student's learning difficulties. If yes, describe any relevant factors that you believe could in fact account for the pattern of the student's learning difficulties. Discuss any factors that are either contributing to or are the primary cause of the child's learning difficulties. This includes such things as environmental or economic disadvantage, cultural or linguistic difference, lack of school experience, poor attendance, inappropriate or ineffective curriculum, lack of primary language instruction, dysfunctional family relationships, etc.)

5. Were any health or developmental factors found to be related to the student's learning difficulties?

(Answer yes or no. If no, describe any relevant findings from health, medical, or developmental history, which were considered but found not to be related to the student's learning difficulties. If yes, describe any relevant findings from health, medical, or developmental history that were missed or incompletely considered by the previous assessment that might in fact be related to or can fully account for the pattern of the student's learning difficulties. Describe only those factors that have some relevancy to and basis for the suspected disability you are evaluating or another disability that may have been missed previously. Do not list information just for background purposes. Results from the school nurse's vision and hearing screening may also be included if relevant.)

6. Were any learning difficulties evident through observation of the student's academic and social functioning?

(Answer yes or no and then describe any relevant findings from observations in different settings and during testing that support your position. The issue here is whether you can see the disability in action with your own eyes, either in the classroom, on the playground, in a variety of activities, during testing, or in relationships with peers, adults, etc. Write about the difficulties you see in academic work, play, relationships, etc. and whether the child seems capable of managing the assignments and expectations of school without any special help. You

might include comments on frustration level, attitude, and self-esteem if you think these might be related to not meeting classroom expectations in any way.)

Evaluation of Abilities and Learning

7. If academic achievement was evaluated, did assessment of the student's performance in this area suggest any learning difficulties and what is the basis and rationale for your determination?

(Answer yes or no. If no, briefly explain why no such evaluation was necessary. Otherwise, if yes, describe the relevant pattern of results obtained in the assessment of academic skills including any data which reflect the current status of the student's functioning in this area and provide a professional opinion about whether the data suggest that the child is performing academically at a level that suggests learning difficulties and whether these difficulties are consistent with or might be related to a particular type of disorder within the areas of suspected disability that were evaluated. You may rely upon any relevant information from any sources at your disposal, such as testing you or someone else may have conducted, as well as data from records review, interviews, observations, work samples portfolios, progress monitoring/CBM data, State achievement testing, etc.)

8. If cognitive ability and processing were evaluated, did assessment of the student's performance in these areas suggest any learning difficulties and what is the basis and rationale for your determination?

(Answer yes or no. If no, briefly explain why no such evaluation was necessary. Otherwise, describe the relevant pattern of results obtained in the assessment of cognitive functioning including test results which reflect the current status of the student's functioning in this area and provide a professional opinion about whether the data suggest the presence of some type of cognitively-based deficit that is consistent with or might be related to a particular type of disorder within the areas of suspected disability that were evaluated. You may rely upon any relevant information from any sources at your disposal, such as testing you or someone else may have conducted, as well as data from records review, interviews, observations, work samples portfolios, independent evaluations, etc.)

9. If social-emotional/behavioral/personality functioning was evaluated, did assessment of the student's performance suggest any learning difficulties and what is the basis and rationale for your determination?

(Answer yes or no. If no, briefly explain why no such evaluation was necessary. Otherwise, describe the relevant pattern of results obtained in the assessment of social-emotional/behavioral/personality functioning including test results which reflect the current status of the student's functioning in this area and provide a professional opinion about whether the data suggest the presence of some type of cognitively-based deficit that is consistent with or might be related to a particular type of disorder within the areas of suspected disability that were evaluated. You may rely upon any relevant information from any

sources at your disposal, such as testing you or someone else may have conducted, as well as data from records review, interviews, observations, work samples portfolios, independent evaluations, etc.)

Opinions and Impressions

10. Given your findings, do you believe that the student has a disability as suspected and if so, what is the nature and extent of the disability?

(Answer yes or no. If no, describe the relevant scientific rationale and logical summary regarding the evidence available that supports your conclusion and overall diagnostic impression. You must be able to explain and defend why the student's observed learning problems, if any, are not related to some type of dysfunction. If yes, describe the relevant scientific rationale and logical summary regarding the evidence available that supports your conclusion and overall diagnostic impression. You must be able to explain and defend why the student's observed learning problems are related to some type of dysfunction.)

Recommendations and Interventions

11. Given the data generated by this evaluation, how do the assessment results inform the development of goals, learning objectives, program modifications, and educational test accommodations appropriate for the student?

(Explain and describe any changes you would recommend in this student's instructional program including any issue related to disability classification, eligibility for special education services, eligibility for other services outside of special education, specific recommendations for evidence-based intervention, or any other type of curricular or systemic modification. Remember that while there may be direct instructional implications for an identified disability, students referred for evaluation who are not so identified or found to be eligible for special instruction and services are still in need of appropriate educational interventions.)

Appendix K

Questions for the Assessment Comps Level III – Re-Evaluation

Questions for the Assessment Comps Level III – Re-Evaluation

An effective triennial psychoeducational evaluation accomplishes four things: 1) it centers on evaluation of the effectiveness and success of the individualized education program; 2) it assesses the past and present status of the student's handicapping condition and instructional needs; 3) it considers what changes are necessary, if any, in the current instructional program or placement; and 4) it links existing information and any new data (gathered when necessary) with specific instructional strategies and appropriate educational interventions that guide, assist, and improve the educational decision making process and program development for the student. To accomplish these goals requires both technical and conceptual knowledge and skill. Technical competence is primarily evident in the report of evaluation that is part of the examination. Conceptual competence is primarily evident in the narrative portion of the examination. Ultimately, your responses to the questions below should demonstrate evidence of competency in these objective by describing the conceptualization that both guided as well as served as the framework for the completion of the technical aspects of the evaluation. This conceptual competency should be evident in your responses particularly when it is not discernable in your accompanying report.

The following questions should be answered in a manner that highlights the rationale and reasoning that resulted in the decisions that were made in the course of your evaluation. This includes satisfactory explanations for things that were conducted and those that were not. Any aspect of your evaluation, irrespective of whether it was or was not included or permitted in your final report (e.g., approach to evaluation, instrument selection, areas of suspected disability, diagnostic impressions, professional opinions, and intervention recommendations). Whether or not something was or was not included, allowed or not allowed, or permitted or not permitted in the course of your evaluation or preparation of your final report, if a question below asks about it, you must be prepared to answer. Responses to the effect, “my supervisor didn’t allow me to...” or “I was not permitted to give...” or “I would have done XBA if...” will not be sufficient to earn a passing score. Whereas you were only partly responsible for the manner in which the evaluation might have been conducted, you are completely responsible for being able to demonstrate that you have the requisite knowledge to have conducted it on your own and in a manner consistent with your training in our program.

Rationale for the Assessment

1. What was the reason and purpose of this assessment?

(Explain why this particular assessment is being conducted as well as its intended purpose regarding the use of the collected information and the opinions you intend to offer. Note that reason and purpose are not the same thing and that each may be driven by different considerations related to practical, social, ethical, educational, theoretical, empirical, policy, and legal issues.)

2. Describe your conceptualization of and the plan for conducting this assessment so that it

effectively addressed the specific issues presented in the referral concerns?

(Explain your conceptualization of this case and how it guided the decisions made in response to considerations regarding the relevant practical, social, ethical, educational, theoretical, empirical, policy, and legal issues.)

3. Does this assessment provide a fair and valid picture of the student's situation and abilities?

(Answer yes or no and then explain the reasons why you believe that the data and information you generated in the course of this assessment are valid and what, if anything, was necessary to make it so.)

Evaluation of Prior Assessment and Current Placement

4. Does the student's current disability classification appear to have been appropriately identified and documented in the previous assessment?

(Answer yes or not then describe the degree of confidence you place in the reliability and validity of the previous assessment as well as the methods with which the disability was identified. Discuss whether you believe the prior evaluation provided a convincing argument regarding the student's disability classification or you believe the previous assessment was inaccurate or problematic in some way.)

5. Have there been any significant changes in the student's functioning since the last assessment?

(Answer yes or no then describe any changes in the nature or severity of the student's functioning and its relationship, or lack thereof, to the current disability classification since the last assessment.)

6. Have special education services been beneficial and appropriate for the student's learning needs?

(Answer yes or no then describe any relevant information or data that indicate that the student has not been benefitting from the special education services that have been provided. Include a discussion of any possible reasons for the lack of progress.)

7. Do the student's current IEP goals and objectives appear to be appropriate to their level of functioning and learning needs and are they making satisfactory progress?

(Answer yes or no then describe whether the current special education placement and services that the student is receiving are or are not appropriate to their level of functioning as evaluated previously or currently. For example, you may include discussion of the nature of the IEP goals and objectives that were developed, issues concerning appropriateness of the placement with respect to least restrictive environment, lack of primary language support in special education, or services that may have been needed but for whatever reason weren't included in the current IEP. In addition, if you believe that the student was inappropriately identified as being disabled

when in fact they were not, you may discuss that in this section as well. If the goals and objectives are appropriate, provide additional discussion regarding whether or not the student is making satisfactory progress toward meeting them and the reasons why or why not.)

Evaluation of Abilities and Learning

8. For the purposes of this assessment, was it necessary to re-evaluate any areas of the student's functioning and what is the basis and rationale for having done so?

(Answer yes or no. If yes, discuss any areas of the student's functioning that were deemed to need re-evaluation and explain in detail the reasons why. Defend the decision to re-evaluate and explain what the new data provided that the existing data did not. If no, explain in sufficient detail why no such re-evaluation was necessary.)

9. What is the significance of the findings from the specific areas of the student's functioning that were re-evaluated with respect to the reason and purpose of the current assessment?

(If there were no areas of functioning that required re-evaluation, you may skip this question. Otherwise, if there were areas of functioning that required re-evaluation, list them and describe the relevant pattern of results obtained as well as what these new results mean with respect to the student's functioning. You may rely upon any relevant information or data from any sources at your disposal, including testing you or someone else may have conducted, as well as data from records review, interviews, observations, work samples portfolios, independent evaluations, etc.)

Opinions and Impressions

10. Taken together, do the available information and data from current and prior sources suggest that the student still needs and requires special education services and what is the basis and rationale for your determination?

(Answer yes or no. If no, describe the relevant scientific rationale and logical summary regarding the evidence available that supports your conclusion and overall impression that the student no longer needs or requires special education and related services. You must be able to demonstrate why you believe that the previously identified disability was not valid, why it was not the primary cause of the observed educational difficulties, and why you are of the opinion that the student can succeed in the regular education environment without special education support. If yes, describe the relevant scientific rationale and logical summary regarding the evidence available that supports your conclusion and overall impression that the student does continue to need and require special education and related services. You must be able to demonstrate why you believe that the previously identified disability is valid, why it is the primary cause of the observed educational difficulties, and why you are of the opinion that the student cannot succeed in the regular education environment without special education support.)

Recommendations and Interventions

11. Given the data generated by this evaluation, how do the assessment results inform the development of academic goals, learning objectives, program/curricular modifications, and educational test accommodations appropriate for the student?

(Explain and describe any additions, deletions, and changes you would recommend in this student's Individualized Education Program including any issues related to disability classification, eligibility for special education services, eligibility for other services outside of special education, placement, specific recommendations for evidence-based intervention, and any other specific type of curricular or programmatic modification or instructional/educational modification that may assist the student in performing better in school.)

Appendix L

Testing Kit Policy

St. John's University
Department of Psychology
Policy for Disposal of Outdated Testing Kits

The department of psychology is in possession of a variety of testing kits, which are measures of personality, academic achievement, and various cognitive abilities. The testing kits are kept in locked cabinets in the testing room, Marillac Hall Sub-basement. The School Psychology Program administrative assistant, is in possession of keys to the testing room, as do the two Teaching Assistants assigned to the testing room, who are chosen by the department with input from core faculty members. Neither professor nor student may remove testing materials from the testing room without speaking with the Teaching Assistants, who monitor the release of materials and sign them in and out of the room.

Testing kits are re-normed every few years, and publishing companies release new editions to replace outdated ones, which the Teaching Assistants are responsible for locating and purchasing with the approval of the department. The old and new testing kits contain copyrighted, sensitive information, which should only be viewed by qualified individuals, or those being trained to administer the tests. The department of psychology is aware of this fact and makes it their policy to store or dispose of these materials properly. One copy of each outdated test is kept in the testing room for archival purposes, and all other copies are shredded or otherwise destroyed. At times, materials are donated to interested parties (i.e. professors doing research, students, etc.) in or outside of the University community.

The Teaching Assistants are not responsible for testing kits owned and used by the Center for Psychological Services. Any questions about this policy should be addressed to the Teaching Assistants, who can be reached via their e-mail addresses.

Appendix M

NASP Standards for Training and Practice

NASP Standards

STANDARD I: SCHOOL PSYCHOLOGY PROGRAM CONTEXT/STRUCTURE

Graduate education in school psychology is delivered within the context of a comprehensive program framework based on clear goals and objectives and a sequential, integrated course of study in which human diversity is emphasized. Graduate education develops candidates' strong affiliation with school psychology, is delivered by qualified faculty, and includes substantial coursework and supervised field experiences necessary for the preparation of competent school psychologists whose services positively impact children, families, schools, and other consumers. In addition to specialist- and/or doctoral-level programs of study, a school psychology program that offers opportunities for respecialization, retraining, and other alternative approaches to credentialing as a school psychologist ensures that program requirements are consistent with NASP graduate preparation standards.

STANDARD II: PRACTICES THAT PERMEATE ALL ASPECTS OF SERVICE DELIVERY: DATA BASED DECISION MAKING AND ACCOUNTABILITY

School psychologists have knowledge of varied methods of assessment and data collection methods for identifying strengths and needs, developing effective services and programs, and measuring progress and outcomes. As part of a systematic and comprehensive process of effective decision making and problem solving that permeates all aspects of service delivery, school psychologists demonstrate skills to use psychological and educational assessment, data collection strategies, and technology resources and apply results to design, implement, and evaluate response to services and programs.

STANDARD III: PRACTICES THAT PERMEATE ALL ASPECTS OF SERVICE DELIVERY: CONSULTATION AND COLLABORATION:

School psychologists have knowledge of varied methods of consultation, collaboration, and communication applicable to individuals, families, groups, and systems and used to promote effective implementation of services. As part of a systematic and comprehensive process of effective decision making and problem solving that permeates all aspects of service delivery, school psychologists demonstrate skills to consult, collaborate, and communicate with others during design, implementation, and evaluation of services and programs.

STANDARD IV: DIRECT AND INDIRECT SERVICES: STUDENT LEVEL SERVICES

School psychologists have knowledge of direct interventions that focus on academic and social/emotional interventions for children and families. School psychologists engage multi-disciplinary teams (including children, teachers, parents, other school professionals) to develop and implement academic and mental health interventions.

Element 4.1: Interventions and Instructional Support to Develop Academic Skills- School psychologists have knowledge of biological, cultural, and social influences on academic skills; human learning, cognitive, and developmental processes; and evidence-based curriculum and instructional strategies. School psychologists, in collaboration with others, demonstrate skills to use assessment and data-collection methods and to implement and evaluate services that support cognitive and academic skills.

Element 4.2: Interventions and Mental Health Services to Develop Social and Life Skills –School psychologists have knowledge of biological, cultural, developmental, and social influences on behavior

and mental health; behavioral and emotional impacts on learning and life skills; and evidence-based strategies to promote social–emotional functioning and mental health. School psychologists, in collaboration with others, demonstrate skills to use assessment and data-collection methods and to implement and evaluate services that support socialization, learning, and mental health.

STANDARD V: DIRECT AND INDIRECT SERVICES: SYSTEMS LEVEL SERVICES – SCHOOLS

School psychologists have knowledge of direct and indirect services that focus on knowledge of schools and system structures, and preventive and responsive services. School psychologists implement school-wide practices to promote learning and knowledge of principles and research related to resilience and risk factors.

Element 5.1: School-Wide Practices to Promote Learning - School psychologists have knowledge of school and systems structure, organization, and theory; general and special education; technology resources; and evidence-based school practices that promote academic outcomes, learning, social development, and mental health. School psychologists, in collaboration with others, demonstrate skills to develop and implement practices and strategies to create and maintain effective and supportive learning environments for children and others.

Element 5.2: Preventive and Responsive Services - School psychologists have knowledge of principles and research related to resilience and risk factors in learning and mental health, services in schools and communities to support multitiered prevention, and evidence-based strategies for effective crisis response. School psychologists, in collaboration with others, demonstrate skills to promote services that enhance learning, mental health, safety, and physical well-being through protective and adaptive factors and to implement effective crisis preparation, response, and recovery.

STANDARD VI: DIRECT AND INDIRECT SERVICES: SYSTEMS LEVEL SERVICES – FAMILY-SCHOOL COLLABORATION

School psychologists have knowledge of principles and research related to family systems, strengths, needs, and culture; evidence-based strategies to support family influences on children’s learning, socialization, and mental health; and methods to develop collaboration between families and schools. School psychologists, in collaboration with others, demonstrate skills to design, implement, and evaluate services that respond to culture and context and facilitate family and school partnership/ interactions with community agencies for enhancement of academic and social–behavioral outcomes for children.

STANDARD VII: FOUNDATIONS OF SCHOOL PSYCHOLOGISTS’ SERVICE DELIVERY: DIVERSITY

School psychologists have knowledge of individual differences, abilities, disabilities, and other diverse characteristics; principles and research related to diversity factors for children, families, and schools, including factors related to culture, context, and individual and role differences; and evidence-based strategies to enhance services and address potential influences related to diversity. School psychologists demonstrate skills to provide professional services that promote effective functioning for individuals, families, and schools with diverse characteristics, cultures, and backgrounds and across multiple contexts, with recognition that an understanding and respect for diversity in development and learning and advocacy for social justice are foundations of all aspects of service delivery.

STANDARD VIII: FOUNDATIONS OF SCHOOL PSYCHOLOGISTS' SERVICE DELIVERY: RESEARCH, PROGRAM EVALUATION, LEGAL, ETHICAL, AND PROFESSIONAL PRACTICE

School psychologists have core foundational knowledge and experiences and implement practices and strategies in research, program evaluation, and legal, ethical and professional practice.

Element 8.1: Research and Program Evaluation - School psychologists have knowledge of research design, statistics, measurement, varied data collection and analysis techniques, and program evaluation methods sufficient for understanding research and interpreting data in applied settings. School psychologists demonstrate skills to evaluate and apply research as a foundation for service delivery and, in collaboration with others, use various techniques and technology resources for data collection, measurement, analysis, and program evaluation to support effective practices at the individual, group, and/or systems levels.

Element 8.2: Legal, Ethical, and Professional Practice - School psychologists have knowledge of the history and foundations of school psychology; multiple service models and methods; ethical, legal, and professional standards; and other factors related to professional identity and effective practice as school psychologists. School psychologists demonstrate skills to provide services consistent with ethical, legal, and professional standards; engage in responsive ethical and professional decision-making; collaborate with other professionals; and apply professional work characteristics needed for effective practice as school psychologists, including respect for human diversity and social justice, communication skills, effective interpersonal skills, responsibility, adaptability, initiative, dependability, and technology skills.

STANDARD IX: PRACTICA AND INTERNSHIPS IN SCHOOL PSYCHOLOGY

During systematic, comprehensive practica and internship experiences consistent with its goals and objectives, the school psychology program ensures that all candidates demonstrate application of knowledge and professional skills in relevant settings and under conditions of appropriate supervision, evaluation, and support. The school psychology program's practica and internship develop and enhance candidates' skills and professional characteristics needed for effective school psychology service delivery; integration of competencies across the standards of professional preparation and practice; and direct, measurable, positive impact on children, families, schools, and other consumers.
