Study Abroad Information Session for Parents
Summer & Fall 2016
Welcome!

We will be happy to answer any questions that you have at the end of the presentation. We plan to start Q&A at 12:45pm.

To ask a question: go into the chat room and type in your question to the Panelist.
When will your student study abroad?
Where We Go...
“Traveling to different areas of the world expands your horizons, unlocks new and exciting opportunities, creates memories with those you'll learn to become close with. Everlasting friendships are created with those you learn to be comfortable with in unique uncomfortable situations. Most of all the world has so much to offer, being able to learn more about yourself as an individual but also those who surround you.” – William Dong

William’s Experience

Lounges/Kitchens
DISCOVER FRANCE—BIENVENUE!

- Academic flexibility: semester-long and modular classes
- Language immersion at any level
- Experiential and service learning
- Home stays and internships available
- Included day and weekend trips: Brittany, Normandy, Strasbourg
- End of Semester 5 day Excursion: French countryside
Program Objectives

• Provide a targeted opportunity for Biology & Chemistry students to study abroad while staying on track for graduation and postgraduate education.
• Expose students to French culture and language—with an emphasis on their health care system.
• Offer a “leg up” for interested students, who can then talk about their experiences in graduate and medical school applications and interviews.
