Pharmaceutical Industry Fellowship Program 2014 - 2015
Actavis and Forest Are Now One Global Company

On July 1, 2014, Actavis completed the acquisition of Forest Laboratories, creating an innovative new model in specialty pharmaceuticals leadership built to compete within today's evolving healthcare landscape. Learn more at www.Actavis.com

About Actavis

Actavis plc (NYSE:ACT), headquartered in Dublin, Ireland, is a unique specialty pharmaceutical company focused on developing, manufacturing and commercializing affordable generic and innovative branded pharmaceutical products for patients around the world.

The Company markets a broad portfolio of branded and generic pharmaceuticals and develops new medicines for patients suffering from diseases principally in the central nervous system, gastroenterology, women’s health, urology, cardiovascular, respiratory and anti-infective therapeutic categories. The Company is an industry leader in product research and development, with one of the broadest brand development pipelines in the pharmaceutical industry, and a leading position in the submission of generic product applications. Actavis has commercial operations in more than 60 countries and operates more than 30 manufacturing and distribution facilities around the world. Additionally, the Company’s North American Brands commercial sales, marketing and drug development & research functions are located in our Jersey City, NJ offices.
2014-2015 Actavis Fellowship Program

Now entering its 12th year, the Actavis Fellowship Program (formerly known as the Forest Research Institute Fellowship) is one of the most dynamic and challenging development programs in the industry. In partnership with St. John’s University College of Pharmacy and Health Sciences, we offer two 2-year fellowships focused in Regulatory Affairs and Clinical Development. Both programs are based in our Jersey City, New Jersey office and designed to offer a broad range of hands-on training and professional development opportunities.

Regulatory Affairs

Our Regulatory Affairs team leads our Company’s business-critical relationships with the U.S. Food and Drug Administration (FDA) and other regulatory agencies throughout the world, ensuring the continued success of our product portfolio and pipeline. Team Fellow activities include:

- Supporting the development, filing and regulatory approval of new products
- Filing and maintaining Investigational New Drug Applications (INDs) and New Drug Applications (NDAs)
- Ensuring team compliance with all appropriate regulations and laws

Clinical Development

Our Clinical Development team is responsible for the development and execution of our global Phase II - IV clinical trials across our therapeutic categories. Team Fellows activities include:

- Participating in the creation, execution and management of clinical trials
- Developing trial protocols and materials
- Training and managing investigative sites
- Analyzing, interpreting, and reporting clinical trial data
- Collaborating with a number of internal teams including Biostatistics, Data Management, Regulatory Affairs, Global Drug Safety, and Global Monitoring Operations
Second Year Rotation

The Actavis Fellowship Program is unique in that it offers the opportunity for fellows to rotate to other functional teams during their second year, helping to accelerate their professional growth and broaden their industry experience. Possible second-year rotations (3-12 months in duration) include:

- Clinical Development
- Global Drug Safety
- Global Monitoring Operations
- Health Economics and Outcomes Research
- Marketing
- Medical Affairs
- New Products Market Research
- New Products Scientific Assessment
- Project Management
- Quality Assurance/Compliance
- Regulatory Affairs
- Regulatory Advertising/Promotion
- External rotations with the FDA are also permitted
St. John’s University College of Pharmacy and Health Sciences, located in Queens, NY, is affiliated and partners with a number of elite healthcare organizations throughout the New York metropolitan area. Founded in 1929, the University offers undergraduate and graduate level healthcare-related programs. Undergraduates and graduates are actively involved in basic science, clinical research, and providing pharmaceutical care to an urban patient population.

**St. John’s University Component**

Fellows are full-time University employees and provided a competitive stipend and benefit package, including comprehensive health insurance. Each Fellow is required to complete a one-semester teaching component at the University during their first year and a collaborative research project by the end of the second year.

Additionally, each Fellow is able to participate in a number of other professional and educational development opportunities at the University, including mentorships; presentations; continuing education courses; resident and fellow seminars; Affiliate Faculty appointments; and a teaching certificate course. Fellows may also enroll and participate in University courses and degree programs.

**Certificate of Completion**

Upon successful completion of the program, Fellows receive a certificate from St. John’s University College of Pharmacy and Health Sciences and Actavis.

“The St. John’s component provides a venue not only to teach students in an academic setting, but also to work on public speaking and your presentation style. This experience has shown benefit far beyond the classroom, especially since conveying information is at the heart of the profession of pharmacy.”

– Joseph P. Stalder, PharmD

Clinical Development Fellow

2009-2011
