Program Completion Rate

This is the number of students who complete the program within 150% of the stated program length. The program length for the professional phase of the program is 24 months and program completion is defined as those students graduating within 36 months. The program's benchmark is currently 70%.

Job Placement Rate

This is the number of graduates employed in the radiologic sciences within twelve months of graduation compared to the number of graduates actively seeking employment in the radiologic sciences. Full-time, part-time, PRN, etc. are all considered as "Employed." The JRCERT has defined not actively seeking employment as: 1) graduate fails to communicate with program officials regarding employment status after multiple attempts, 2) graduate is unwilling to seek employment that requires relocation, 3) graduate is unwilling to accept employment due to salary or hours, 4) graduate is on active military duty, and/or 5) graduate is continuing education.

**Note – The JRCERT 2014 Standards for Program Accreditation adjusted the calculation for job placement rate to 12 months post-graduation. All data indicated below is updated to 12 months post-graduation.
